

Central Lincolnshire Five Year Land Supply Report
1 April 2016 to 31 March 2021

(Published April 2016)

1. Introduction

The National Planning Policy Framework (NPPF)¹ requires local planning authorities to identify and update annually a supply of specific deliverable sites sufficient to provide five years worth of housing against their housing requirements.

This report sets out the five year land supply for Central Lincolnshire for the period 2016 to 2021. The 'current year' (2015/16) is not used in the calculation of the five year supply. This is to ensure that at any point during the current year the Five Year Land Supply Report will include a full five year supply of land.

This report is a partial update on the Five Year Land Supply Report published in October 2015 for the same five year period. This update has been undertaken to support the Proposed Submission Local Plan (April 2016) and to take account of the most up to date position on sites from the three districts and the proposed allocations in the Local Plan as revised following the Further Draft version (October 2015) of the Local Plan.

Appendix 1 provides a summary of all sites and the predicted delivery rates during the five year period. This is based on monitoring data as at 31 March 2015 and as provided by each district (North Kesteven, West Lindsey and City of Lincoln) which make up Central Lincolnshire.

2. Five Year Requirement

The National Planning Practice Guidance (NPPG)² advises that housing figures in up-to-date Local Plans should be used as the starting point for identifying the five year requirement. However, the adopted plans for City of Lincoln (1998), North Kesteven (2007) and West Lindsey (2006) are, for housing supply purposes, predominantly outdated. The NPPG states '*where evidence in Local Plans has become outdated and policies in emerging plans are not yet capable of carrying sufficient weight, information provided in the latest full assessment of housing needs should be considered*'.

Central Lincolnshire is currently producing a joint Local Plan which includes a joint evidence base and a joint assessment of development needs.

The Central Lincolnshire Local Plan, the proposed submission version of which is to be published for consultation on 15 April 2016, identifies a housing requirement for 36,960 dwellings between 2012 and 2036 (or 1,540 dwellings per year over the 24 year plan period). This is based on evidence in the Strategic Housing Market Assessment (SHMA) July 2015.

The basic five year land supply requirement between 2012 and 2036 is therefore 7,700 dwellings, as summarised in Table 1.

¹ NPPF Paragraph 47

(https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/6077/2116950.pdf)

² NPPG (<http://planningguidance.communities.gov.uk/>)

Table 1: The Basic Five Year Land supply requirement 2016 to 2021

a	Housing Requirement 1 April 2012 to 31 March 2036 (24 year period)	36,960	
b	Average per year	1,540	a ÷ 24
c	Basic five year requirement	7,700	b x 5

However, account must be taken of the completions between 1 April 2012 and 31 March 2015, and any under- or over-supply during that period. Between 1 April 2012 and 31 March 2015 a total of 2,743 dwellings were completed. This represents an undersupply of 1,877 dwellings when compared against the basic requirement. Table 2 (row f) sets out how this has been calculated.

The NPPG states that '*Local planning authorities should aim to deal with any undersupply within the first five years of the plan period where possible*'.³ This means that the shortfall of 1,877 dwellings should be added to the basic five year requirement of 7,700, rather than distributing the undersupply over the remaining plan period. An estimate of the supply against requirement for the current year 2015/16 also need to be factored in. We estimate 1,126 dwellings can be delivered in the current year (2015/16). This represents an undersupply of 414 dwellings when compared against the requirement for 1,540.

Therefore, the five year requirement increases to 9,991. (Table 2 shows how this has been calculated).

Table 2: Undersupply 2012 to 2015

d	Net completions 1 April 2012 to 31 March 2015 (3 year period)	2,743	See Table 3
e	Target delivery for 1 April 2012 to 31 March 2015 (three year period)	4,620	b x 3
f	Shortfall for 2012 to 2015	1,877	e - d
g	Estimated completions current year (2015/16)	1,126	See table 5
h	Estimated difference for 15/16 compared with 1,540 requirement	414 undersupply	g - b
i	Five Year requirement taking into account shortfall 2012-15 and 2015-16	9,991	c + f - h

However, once the five year requirement has been calculated the NPPF then requires local authorities to identify a 5% buffer to ensure choice and competition in the market, and where there has been a record of persistent under-delivery of housing, this should be increased to 20%. It is made clear in the NPPF that this additional requirement is moved from further in the plan period and not an additional requirement for more housing.

Table 3: Completions 2012 to 2015

	2012/13	2013/14	2014/15	Total
City of Lincoln	233	236	166	635
West Lindsey	258	289	378	922
North Kesteven	319	237	443	1,186
Completions	810	762	987	2,743

³ Paragraph: 035Reference ID: 3-035-20140306

As set out in Table 3 the Central Lincolnshire Authorities have delivered a total 2,743 dwellings over the last three years, this equates to an average of 914 dwellings per year. This represents a shortfall when compared to the basic requirement of 1,540 per year (see table 2 column e).

Whilst national guidance is unclear on the matter, some might argue that the area has, thus, persistently undersupplied and therefore are required to include an additional 20% buffer (rather than 5%). On this worst case scenario, this means that between 2016 and 2021 the five year requirement should increase by an additional 1,540 dwellings.

Table 4: Five year land supply including backlog and twenty percent buffer

j	Twenty percent buffer	1,540	$c \times 0.20$
k	Total five year land supply taking into account twenty percent buffer	11,531	$j + i$
l	Average per year	2,306	$k \div 5$

The five year land supply requirement for 2016 to 2021 is therefore 11,531 dwellings.

3. Five Year Supply

For a site to be considered deliverable the NPPF requires that the site '*should be available now, with a realistic prospect that housing will be delivered on the site within five years and in particular that development of the site is viable*'.⁴

A deliverable site includes:

- Sites under construction
- Sites with full planning permission, but development has not started
- Sites where there is a resolution to grant planning permission
- Sites with outline planning permission
- Sites allocated in an adopted Local Plan
- Sites in an emerging Local Plan

The NPPF states that '*local planning authorities may make an allowance for windfall sites in the five year supply if they have compelling evidence that sites have consistently become available*'.⁵ This evidence is explained in Appendix 2, it demonstrates that windfall sites under 25 dwellings can reasonably be included in the calculation of the five year supply.

The Central Lincolnshire Proposed Submission Local Plan April 2016 includes proposed residential site allocations. The NPPG states that '*If there are no significant constraints to overcome, such as infrastructure, sites not allocated within a development plan or without planning permission can be considered capable of being delivered within a five-year timeframe*'.

Appendix 1 provides a list of all such sites and the expected delivery rate. Where a site has planning permission, the dwelling figure is that for which permission was granted. Where a site is under construction, the dwelling figure shown is the remaining number still to be

⁴ Footnote 11 of the NPPF page 12

⁵ NPPF Paragraph 48

completed (at 1 April 2015) in accordance with the permission. For new Allocations the figure used is the 'indicative dwelling' set out in the Proposed Submission Local Plan (April 2016).

4. Calculating the Five Year Supply

The following table provides a summary of the five year supply of deliverable housing sites. The information is correct at 31 March 2015. Full details are set out in Appendix 1.

Table 5: Summary of Five Year Supply

Type of permission	2015/16 current year	2016/17 Yr 1	2017/18 Yr 2	2018/19 Yr 3	2019/20 Yr 4	2020/21 Yr 5	Estimated Total in five years
Sites with permission	1,126	1,348	836	767	711	540	4,202
Emerging new Allocations as identified in Proposed Submission Local Plan (April 2016)	0	107	733	1,927	2,262	2,304	7,333
Windfall allowance Lincoln City ⁶	0	0	75	75	75	75	300
Windfall allowance in rural area ⁶	0	0	112	112	112	112	448
Total	1,126	1,455	1,756	2,881	3,160	3,031	12,283

The five year land supply results are set out in the following table.

Table 6: Five Year Supply

m	Estimate of five year land supply	12,283	See Table 5
n	Total (year)	5.33 years	m/l

The results show that the Central Lincolnshire Authorities have sufficient land to more than meet the five year requirement of 11,531 dwellings and can demonstrate 5.33 year supply – a surplus of 752 dwellings.

⁶ See Appendix 2

Appendix 1

Summary of all sites

Appendix 1

Appendix 1 list all sites included in the five year land supply and the estimated delivery rate of development. This information is correct at 31 March 2015. It is based on data provided by each district council. Any site with planning permission for 25 dwellings or more are included as a Preferred Allocation in the draft Local Plan (October 2015).

Appendix 2

Windfall Allowance

The NPPF⁷ states that 'local planning authorities may make an allowance for windfall sites in the five year supply if they have compelling evidence that sites have consistently become available' The Local Plan allocates sites of 25 dwellings or more, therefore there is justification for including a windfall allowance for small sites below 25.

An allowance of 75 dwellings per year for small sites (under 25), starting in 2017/18, is allowed for in the Lincoln Urban Area. This assumption has been included in the Local Plan and is based on previous completions on small sites (with 75 being the lowest achieved over the past several years, and therefore a conservative estimate). It is assumed that any windfall sites to be delivered in 2015/16 and 2016/17 years would already have planning permission and therefore have already been accounted for in the commitment data.

A windfall allowance for small villages (categories 5 and 6 of the Settlement Hierarchy in the Proposed Submission Local Plan) is shown in Table 5 based on the levels of growth set out in Local Plan Policy LP4.

No other windfall allowances have been made, for any other settlement (levels 1-4 of the settlement hierarchy) or the open countryside.

The overall windfall allowance (at 187 dwellings per year) across three council areas is therefore considered a conservative estimate, and highly likely to be exceeded in practice. It is therefore justified to allow for this amount in terms of calculating the five year land supply.
