

**Central Lincolnshire Five Year Land Supply Report  
1 April 2017 to 31 March 2022**

**(Published September 2016)**

## 1. Introduction

The National Planning Policy Framework (NPPF)<sup>1</sup> requires local planning authorities to identify and update annually a supply of specific deliverable sites sufficient to provide five years worth of housing against their housing requirements.

This report sets out the five year land supply for Central Lincolnshire for the period 2017 to 2022. The 'current year' (2016/17) is not used in the calculation of the five year supply. This is to ensure that at any point during the current year the Five Year Land Supply Report will include a full five year supply of land.

Appendix 1 provides a summary of all sites and the predicted delivery rates during the five year period. This is based on monitoring data as at 31 March 2016 and as provided by each district (North Kesteven, West Lindsey and City of Lincoln) which make up Central Lincolnshire.

## 2. Five Year Requirement

The National Planning Practice Guidance (NPPG)<sup>2</sup> advises that housing figures in up-to-date Local Plans should be used as the starting point for identifying the five year requirement. However, the adopted plans for City of Lincoln (1998), North Kesteven (2007) and West Lindsey (2006) are, for housing supply purposes, predominantly outdated. The NPPG states *'where evidence in Local Plans has become outdated and policies in emerging plans are not yet capable of carrying sufficient weight, information provided in the latest full assessment of housing needs should be considered'*.

Central Lincolnshire is currently producing a joint Local Plan which includes a joint evidence base and a joint assessment of development needs.

The Central Lincolnshire Local Plan, which was submitted to the Planning Inspectorate on 29 June 2016, identifies a housing requirement for 36,960 dwellings between 2012 and 2036 (or 1,540 dwellings per year over the 24 year plan period). This is based on evidence in the Strategic Housing Market Assessment (SHMA) July 2015.

**The basic five year land supply requirement between 2012 and 2036 is therefore 7,700 dwellings**, as summarised in Table 1.

---

<sup>1</sup> NPPF Paragraph 47

([https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/6077/2116950.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/6077/2116950.pdf))

<sup>2</sup> NPPG (<http://planningguidance.communities.gov.uk/>)

**Table 1: The Basic Five Year Land supply requirement 2016 to 2021**

a	Housing Requirement 1 April 2012 to 31 March 2036 (24 year period)	36,960	
b	Average per year	1,540	a ÷ 24
c	Basic five year requirement	7,700	b x 5

However, account must be taken of the completions between 1 April 2012 and 31 March 2016, and any under or over-supply during that period. Between 1 April 2012 and 31 March 2016 a total of 3,735 dwellings were completed. This represents an undersupply of 2,425 dwellings when compared against the basic requirement. Table 2 (row f) sets out how this has been calculated.

The NPPG states that '*Local planning authorities should aim to deal with any undersupply within the first five years of the plan period where possible*'.<sup>3</sup> This means that the shortfall of 2,425 dwellings should be added to the basic five year requirement of 7,700, rather than distributing the undersupply over the remaining plan period. An estimate of the supply against requirement for the current year 2016/17 also needs to be factored in. We estimate 1,113 dwellings can be delivered in the current year (2016/17). This represents an undersupply of 427 dwellings when compared against the requirement for 1,540.

Therefore, the five year requirement increases to 10,552. (Table 2 shows how this has been calculated).

**Table 2: Undersupply 2012 to 2015**

d	Net completions 1 April 2012 to 31 March 2016 (4 year period)	3,735	See Table 3
e	Target delivery for 1 April 2012 to 31 March 2016 (four year period)	6,160	b x 3
f	Shortfall for 2012 to 2016	2,425	e - d
g	Estimated completions current year (2016/17)	1,113	See table 5
h	Estimated difference for 16/17 compared with 1,540 requirement	427 undersupply	g - b
i	Five Year requirement taking into account shortfall 2012-16 and 2016-17	10,552	c + f - h

However, once the five year requirement has been calculated the NPPF then requires local authorities to identify a 5% buffer to ensure choice and competition in the market, and where there has been a record of persistent under-delivery of housing, this should be increased to 20%. It is made clear in the NPPF that this additional requirement is moved from further in the plan period and not an additional requirement for more housing.

**Table 3: Completions 2012 to 2016**

	2012/13	2013/14	2014/15	2015/16	Total
<b>City of Lincoln</b>	233	236	166	235	870
<b>West Lindsey</b>	258	289	378	284	1,207
<b>North Kesteven</b>	319	237	443	473	1,658
<b>Completions</b>	<b>810</b>	<b>762</b>	<b>987</b>	<b>992</b>	<b>3,735</b>

<sup>3</sup> Paragraph: 035Reference ID: 3-035-20140306

As set out in Table 3 the Central Lincolnshire Authorities have delivered a total 3,735 dwellings over the last four years, this equates to an average of 934 dwellings per year. This represents a shortfall when compared to the basic requirement of 1,540 per year (see table 2 column e).

Whilst national guidance is unclear on the matter, some might argue that the area has, thus, persistently undersupplied and therefore are required to include an additional 20% buffer (rather than 5%). On this worst case scenario, this means that between 2017 and 2022 the five year requirement should increase by an additional 1,540 dwellings.

**Table 4: Five year land supply including backlog and twenty percent buffer**

j	Twenty percent buffer	1,540	c x 0.20
k	Total five year land supply requirement taking into account twenty percent buffer	12,092	j + i
l	Average per year	2,418	k ÷ 5

**The five year land supply requirement for 2017 to 2022 is therefore 12,092 dwellings.**

### 3. Five Year Supply

For a site to be considered deliverable the NPPF requires that the site '*should be available now, with a realistic prospect that housing will be delivered on the site within five years and in particular that development of the site is viable*'.<sup>4</sup>

A deliverable site includes:

- Sites under construction
- Sites with full planning permission, but development has not started
- Sites where there is a resolution to grant planning permission
- Sites with outline planning permission
- Sites allocated in an adopted Local Plan
- Sites in an emerging Local Plan

The NPPF states that '*local planning authorities may make an allowance for windfall sites in the five year supply if they have compelling evidence that sites have consistently become available*'.<sup>5</sup> This evidence is explained in Appendix 2, it demonstrates that windfall sites under 25 dwellings can reasonably be included in the calculation of the five year supply.

The submitted Central Lincolnshire Local Plan includes proposed residential site allocations. The NPPG states that '*If there are no significant constraints to overcome, such as infrastructure, sites not allocated within a development plan or without planning permission can be considered capable of being delivered within a five-year timeframe*'.

Appendix 1 provides a list of all such sites and the expected delivery rate. Where a site already has planning permission, the dwelling figure is that for which permission was granted. Where a site is under construction, the outstanding dwelling figure shown is the remaining number still to be completed (at 1 April 2016) in accordance with the permission.

<sup>4</sup> Footnote 11 of the NPPF page 12

<sup>5</sup> NPPF Paragraph 48

For new Allocations without planning permission the figure used is the 'indicative dwelling' set out in the Central Lincolnshire Local Plan, as submitted in June 2016. Appendix 1 of this version of the Five Year Land Supply Report also includes an additional section with sites that have received planning permission since 1 April 2016, and that are proposed as allocations in the Local Plan through the modifications process.

Additionally Appendix 1 includes two sources of windfall provision from small sites (fewer than 25 dwellings) in the Lincoln urban area, where there has been a substantial and consistent supply, and in small and medium villages in line with policy LP4 of the submitted Local Plan. These sources of supply are not accounted for in the current year or year one of the supply to avoid double-counting of sites with permission which are already included (see Appendix 2 for more details).

#### 4. Calculating the Five Year Supply

The following table provides a summary of the five year supply of deliverable housing sites. The information is correct at 31 March 2016. Full details are set out in Appendix 1.

**Table 5: Summary of Five Year Supply**

Type of permission	2016/17 current year	2017/18 Yr 1	2018/19 Yr 2	2019/20 Yr 3	2020/21 Yr 4	2021/22 Yr 5	Estimated Total in five years
Sites with permission	1,113	1,521	1,539	1,503	1,216	984	6,763
Emerging new Allocations as identified in Proposed Submission Local Plan (April 2016)	0	25	340	1,112	1,729	1,995	5,201
Windfall allowance Lincoln City <sup>6</sup>	0	0	75	75	75	75	300
Windfall allowance in rural area <sup>6</sup>	0	0	112	112	112	112	448
<b>Total</b>	<b>1,113</b>	<b>1,546</b>	<b>2,066</b>	<b>2,802</b>	<b>3,132</b>	<b>3,166</b>	<b>12,712</b>

The five year land supply results are set out in the following table.

**Table 6: Five Year Supply**

m	Estimate of five year land supply	<b>12,712</b>	See Table 5
n	Total (year)	<b>5.26 years</b>	m/l

The results show that the Central Lincolnshire Authorities have sufficient land to more than meet the five year requirement of 12,092 dwellings and can demonstrate 5.26 year supply – a surplus of 620 dwellings.

---

<sup>6</sup> See Appendix 2

## 5. Alternative Calculations

This report, and the data used, has taken a precautionary approach to calculating the five year land supply. For example, it has used 20% (rather than 5%) buffer; it has used the 'Sedgefield' method of placing the backlog into the five year period (rather than the 'Liverpool' method of spreading the backlog over the rest of the plan period); it has used a very conservative windfall allowance (making no allowance, for example, for windfall in the larger settlements except Lincoln); it has been conservative in start dates for completions, as well as taken a modest view as to the trajectory of delivery. Despite this conservative approach, it is still demonstrated that a five year land supply exists.

However, some recent Inspector decisions consider the 'Liverpool' method to be a more appropriate method in terms of dealing with the backlog, especially in scenarios where a significant amount of the overall plan supply relies (to a reasonable degree) on large site delivery. This scenario does apply for Central Lincolnshire.

As such, for completeness, the Liverpool method of calculating the five year land supply is set out below. This demonstrates that a 6.4 year supply exists, when using this methodology.

**Table 7: Five Year Supply Calculation using Liverpool Method**

a	Housing Requirement 1 April 2012 to 31 March 2036 (24 year period)	36,960	
b	Average per year	1,540	a /24
c	Five year requirement at 1 April 2012	7,700	b x 5
Undersupply 2012 to 2016			
d	Net completions 1 April 2012 to 31 March 2016 (4 year period)	3,735	see table 3
e	Target delivery rate 1 April 2012 to 31 March 2016	6,160	b x 4
f	Shortfall for 2012 to 2016	2,425	c – e
g	Estimate Current year	1,113	see table 5
h	Estimate of shortfall current year 2016/17	-427	g – b
i	Total Undersupply 2012 to 2017	2,852	f + h
j	Five Year requirement taking into account shortfall (shortfall spread across 19 remaining years 2017-2036 - 150 per year or 751 in 5 years)	8,451	c + i
K	Average per year taking into account shortfall	1,690	J/K
20% buffer			
m	Twenty percent buffer	1,540	c x 0.20
n	Total five year land supply target taking into account twenty percent buffer	9,991	j + m
o	Average per year	1,998	L / 5
Estimated five year supply 2017 to 2022			
p	Estimate of five year land supply	<b>12,712</b>	see table 6
q	Total supply in five year period (year)	<b>6.4 years</b>	p / o

Finally, for completeness, we are aware of the inconsistent application by decision makers (Inspectors / Ministers / Local Planning Authorities) as to whether to apply a 'buffer to backlog', i.e. whether the 5% or 20% buffer (as applicable) should apply to just the basic five year land requirement, or whether it should also apply to the backlog.

In this respect, the Central Lincolnshire Joint Strategic Planning Committee is firmly of the view that the buffer should not apply to the backlog, as supported by a recent Ministerial decision (irrespective of other recent Inspector decisions).<sup>7</sup>

To justify the Committee's position on this point, the NPPF states that the buffer should be "moved forward from later in the plan period", which equates to 1,540 dwellings taken from the period 2022/23 to 2035/36 in the Central Lincolnshire case. There is nothing in the NPPF or NPPG to suggest that the buffer should also apply to the backlog, and, indeed, it is inconsistent with the NPPF to do so. This inconsistency would arise because it would be 'bringing forward from later in the plan period' a greater amount than the NPPF stipulates. In Central Lincolnshire's case, and based on the Sedgfield method, applying the buffer to backlog would be 'bringing forward from later in the plan period' 2,110 dwellings, or a 27.4% 'buffer', which clearly exceeds the 20% buffer which NPPF requires.

The only logical way in which a buffer can be applied to backlog is if the Liverpool method is also applied, because in that scenario there could be an argument that the annual requirement 'from later in the plan period' is indeed increased from the basic annual requirement, because the backlog has been spread across all years, including those 'later in the plan period'.

Thus, the Committee is quite clear that, to be consistent with the NPPF, the buffer to backlog can only apply if the Liverpool method also applies. If the Liverpool method is not applied, neither can the buffer to backlog.

---

# Appendix 1

Details of all sites

# Appendix 1

Appendix 1 lists all sites included in the five year land supply and the estimated delivery rate of development. This information is correct at 31 March 2016. It is based on data provided by each district council. Any site with planning permission for 25 dwellings or more are included as a allocation in the submitted Local Plan.

Sites	Total Capacity Planning Permission / Allocation	Total Completed on site at 31 March 2016	Total Outstanding at 31 March 2016	Under Construction	Current year 2016/2017	Year 1 2017/18	Year 2 2018/19	Year 3 2019/20	Year 4 2020/21	Year 5 2021/22	Total Five years

## Appendix 2

### Windfall Allowance

The NPPF<sup>8</sup> states that 'local planning authorities may make an allowance for windfall sites in the five year supply if they have compelling evidence that sites have consistently become available' The Local Plan allocates sites of 25 dwellings or more, therefore there is justification for including a windfall allowance for small sites below 25.

An allowance of 75 dwellings per year for small sites (under 25), starting in 2018/19, is allowed for in the Lincoln Urban Area. This assumption has been included in the Local Plan and is based on previous completions on small sites (with 75 being the lowest achieved over the past several years, and therefore a conservative estimate). It is assumed that any windfall sites to be delivered in years 2016/17 and 2017/18 would already have planning permission and therefore have already been accounted for in the commitment data.

A windfall allowance for small villages (categories 5 and 6 of the Settlement Hierarchy in the Proposed Submission Local Plan) is shown in Table 5 based on the levels of growth set out in Local Plan Policy LP4.

No other windfall allowances have been made, for growth from small sites in any other towns or villages (levels 1-4 of the settlement hierarchy) or the open countryside.

The overall windfall allowance (at 187 dwellings per year) across three council areas is therefore considered a conservative estimate, and highly likely to be exceeded in practice. It is therefore justified to allow for this amount in terms of calculating the five year land supply.
