

# NK PLAN 2018-21 Consultation

## Analysis of Results

- Consultation for the NK Plan 2018-21 was split into two distinct areas comprising a resident survey, and a range of face to face sessions with a variety of stakeholder groups.
- This document reflects this structure with the first part focusing on results and analysis of the resident survey, and the second part on the stakeholder groups.
- The resident survey ran for 4 weeks from mid November to mid December receiving 3,121 responses. This document focuses on the questions within the survey specific to the NK Plan 2018-21, these being:
  - Views on the most important issues in the district and those most in need of improvement
  - Feedback on the proposed Our Environment priority
  - Feedback on the Council's priorities overall Economy, Homes, Communities, Council, Environmentand includes:
  - Results and analysis by gender and age group
  - Results and analysis at ward level
- The consultations with stakeholder groups were undertaken between early October and end November. As with the resident survey these focused on the proposed Our Environment priority, the priorities overall, plus also included a ranking of strategic drivers and priorities, and consideration as to whether the council has the capacity to deliver these priorities, and whether there is clarity as to the benefits that these priorities will deliver for the district.

# SECTION 1 : RESIDENT SURVEY

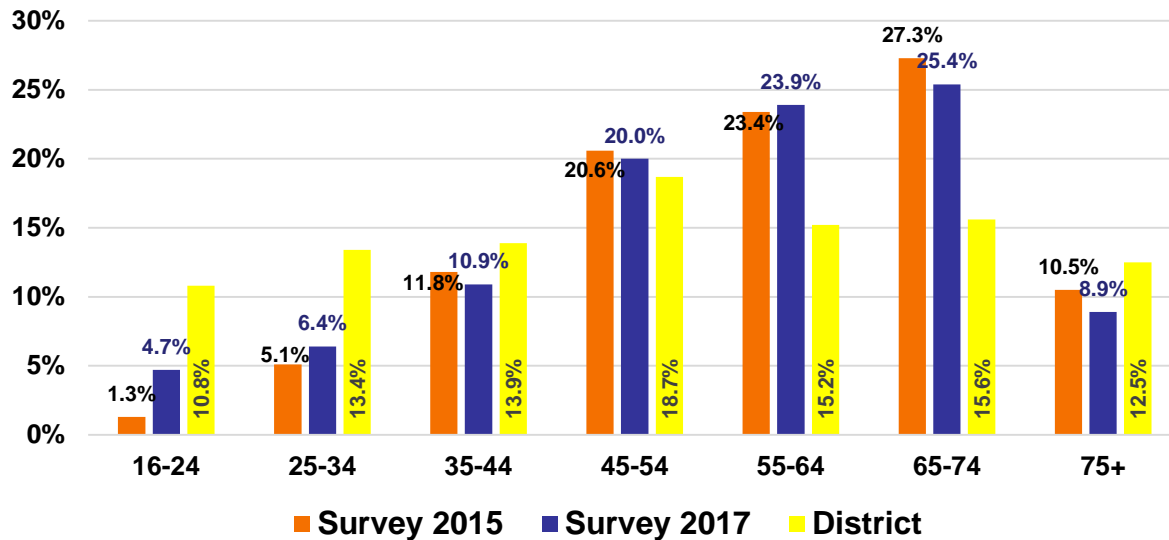

## Highlights

- 3,121 responses received, giving a 1.7% margin of error based on a 95% confidence level.
- Improved uptake in the younger demographic groups.
- High levels of support across gender, all age groups and all geographies for the proposed **Our Environment** priority.
- High level of support for the Council's priorities overall.
- The top and bottom five most important issues unchanged when compared with the 2015 survey; The top five all five saw a decline in the percentage of residents selecting them including:
  - 7% fewer selecting **Crime and ASB**, and 4% fewer selecting services which are value for money
- The bottom five all saw small increases in the percentage selecting them.
- **Affordable housing** and **Access to public transport** both moved into the top 5 issues requiring most improvement seeing the percentage selecting them increase by 4.8 and 2.7 percentage points respectively.
- **Traffic congestion** remained as both the most important issue and the one needing most improvement scoring 58.2% and 56.6% respectively, and once again was some way ahead of the next most important and needs most improvement issues.
- **Services that are value for money** saw a fall of 11.1 points in terms of the percentage of respondents selecting it as one of their five most in need of improvement issues moving from 34.7% to 23.4% this year.
- Gender wise female respondents scored both **traffic congestion** and **crime & ASB** significantly lower than male respondents in term of importance, and also lower in terms of need for improvement.
- There were a number of disparities in terms of age groups with the younger demographics scoring **affordable housing**, **access to jobs within the district** and **struggling with the cost of living** more highly than other demographics.
- At ward level there is a clear distinction between the rural wards and those more urbanised, and especially those on the Lincoln fringe. Rural wards scored **access to public transport**, **mobile coverage**, and **internet access** much more highly, whilst **traffic congestion**, and in most but not all instances, **crime and ASB**, far lower. Conversely every North Hykeham ward scored **traffic congestion** at over 70% in both importance and need for improvement.

## Resident Survey Respondent Profile: Age

- The survey was directly provided in paper form to approximately 800 residents and electronically to some 13,000 further residents.
- 3,121** residents completed the survey. 3,085 declared their gender, and 3,058 their age band, with 3,045 declaring both – this final figure covers almost 98% of respondents, as compared with 89% in the 2015 survey. The profile of these residents is set out below and compared with the latest ONS mid year population estimate for North Kesteven residents aged 16+. The overall response rate gives a margin of error of c.1.7% with a 95% confidence level.

**Chart 1. Respondent Age Profile vs District Age Profile**

- Whilst chart 1 shows that a skew remains in terms of the response distribution there has been improvement:
- Response rate for 16-24s has more than tripled moving from just 1.3% in the 2015 survey to 4.7% in this survey.
- Response rate for 25-34s has increased from 5.1% to 6.4%.

Age Group	Response (n)
16-24	144
25-34	197
35-44	333
45-54	611
55-64	732
65-74	768
Over 75s	273

- Despite these improvements both remain under-represented highlighting the need to build further in future surveys.
- To a lesser extent the 34-44s and Over 75s are both slightly under-represented, and, in percentage terms, have shown a slight decline as compared with the 2015 survey. In the latter group there was also a decrease in the number of paper copies returned to the Council.
- As with the 2015 survey the 55-64, and 65-74 age groups continue to be significantly over-represented.
- Given the increase in the overall response rate an age weighted assessment has been possible for this survey and the results on subsequent pages reflect both the raw and age-weighted response.
- Table 1 right shows the actual number of responses from each age banding.

# Resident Survey Respondent Profile : Gender

- 3,085 respondents (99%) declared their gender, with this giving a female:male ratio of 43:57, as compared with a ratio for the district aged 16 and over population of 51:49. This is the same at the 2015 survey split. However as the charts below show this imbalance flows both ways.

DISTRICT

- The first set of pie charts show the gender split for the three age bands within the 16-44 age range.
- As the charts show whilst the district has a near to 50:50 ratio in each of these age groups the survey response has a strong, and increasing by age, female bias. 61% of 16-24 respondents were female, increasing to 65% for 25-34s, and over 67% for 35-44s
- This prompts the question as to how males in these age groups can be better engaged with in future surveys.

SURVEY

DISTRICT

- The pie chart to the left shows that the 45-54 gender split almost exactly mirrors that for the district
- However the second set of charts to the right for the three age bands from 55 show a strong male response bias.
- The 55-64 age group shows 63% of responses of being from males, with this increasing to over 68% in the 65-74 age group.

DISTRICT

SURVEY

- At a district level the female: male ratio shifts to 55:45 female to male, however in terms of survey responses almost 80% were from males.
- Given that these groups account for the a disproportionate percentage of respondents to the survey this explains the overall gender imbalance within the survey.
- It again prompts the question as to how to better engage with females within these three older demographic groups

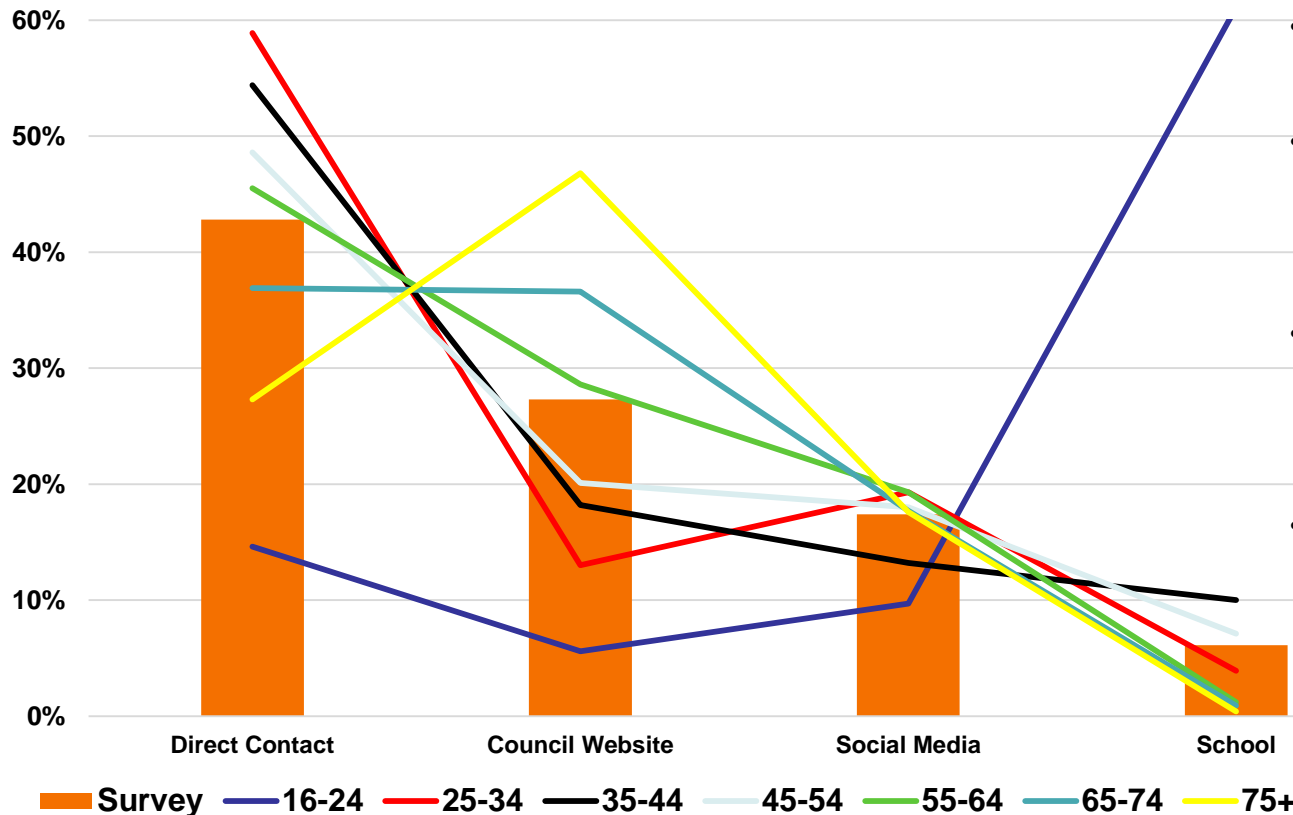

SURVEY

## Resident Survey : Engagement

- Although the resident survey attracted an excellent overall response rate as the previous pages have shown there has been considerable variance between demographic groups. As previously noted the survey was emailed to subscribers of the garden waste service, and emailed / sent in hard copy to the viewpoint panel. In addition it was promoted via social media and the Council's website, plus every school in the district was contacted and asked to promote it through school communications with parents and carers.
- Respondents were asked to confirm how they had heard about the survey with the absolute numbers shown in table 2.

Age Group	Response (n)
Direct Contact	1343
Council Website	859
Social Media	547
School	191
Parish Council	89
District Councillor	58
Word of Mouth	54

Chart 2. PRIMARY ENGAGEMENT METHODS

- Chart 2 shows the 4 primary engagement prompts and for each age group the percentage choosing each.
- Direct contact (direct email / letter) was the main engagement sources for the 25-74 age bands. Although for the 65-74s it was only 0.3% ahead of the Council's website.
- 16-24s were mainly engaged through schools – reflecting the active contact made with the sixth forms; whilst the Council Website was the main source for the over 75s.
- Social Media accounted for 17.4% at the survey level, but as the chart shows this was least effective for the youngest demographic, followed by 35-44 years old. Whilst 24-35s have the highest % at 19.3% this was only slightly higher than 17.6% for over 75s

# Resident Survey Our Environment Priority (1)

- The survey asked respondents whether they agreed or not with the proposed new fifth priority for the Council – Our Environment. Residents across all age groups gave a strongly positive response to this question

### Chart 3. Support for Our Environment Priority by Age Band

- Overall positive support (weighted) is 92.1%, marginally below the raw figure of 92.2%
- Chart 3 left, shows the level of positive support by age band. This shows very high levels of support across all age bands, although perhaps counter-intuitively the two youngest age bands recorded two of the three lowest levels of positive support
- Chart 4 below shows positive support by gender, revealing a more positive female support, although again in the context of very high levels of overall support
- A significant number of those not supporting the priority added comments, with around half indicating support for the priority, but registering disagreement as they believed it should be the overarching priority.

### Chart 4. Support for Our Environment Priority by Gender

## Resident Survey Our Environment Priority (2)

- The scale of the response to the survey allows an *indicative* view to be taken at ward level. Support for the Our Environment priority showed some variance by ward, however even the least supportive, North Hykeham Forum at 84.5% still, in relative terms showed strong support for the priority. At the other end of the scale Sleaford Holdingham recorded 98.4% support

# Resident Survey Is the Council Focused on the Right Things? (1)

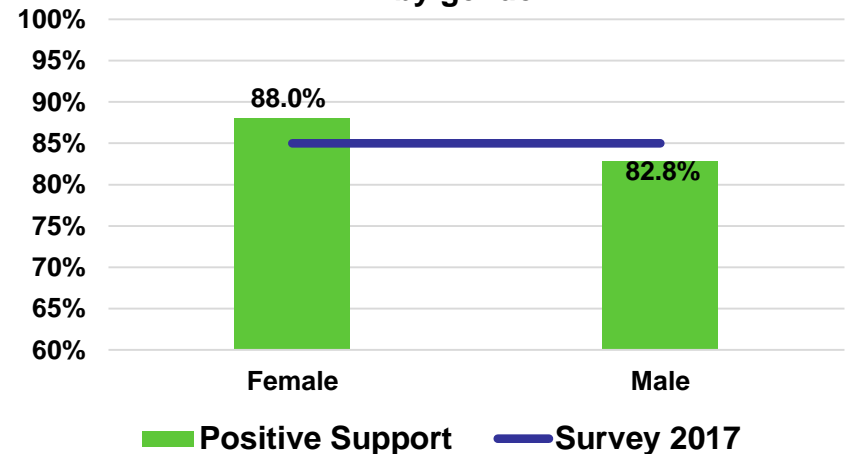

- The survey asked respondents whether they agreed or not with the proposed Council priorities. This same question was also asked in the 2015 resident consultation on the NK Plan

**Chart 6. Support for the Council's priorities by age band**

- Overall positive support (weighted) is 85.0%, marginally above the raw figure of 84.9% - as compared with 79% in the 2015 survey.
- Chart 6, left, shows the level of positive support by age band. In contrast to the Our Environment priority the 35-44 age group recorded the lowest level of support for this question – albeit still being over 80%
- Older residents were broadly more positive than the younger groups, although with a slight dip in the 55-64 group
- Chart 7 below shows positive support by gender, revealing more positive female support, although again in the context of very high levels of overall support
- The biggest concern, commented on as often by those supporting the priorities, is around infrastructure provision to align with housing growth

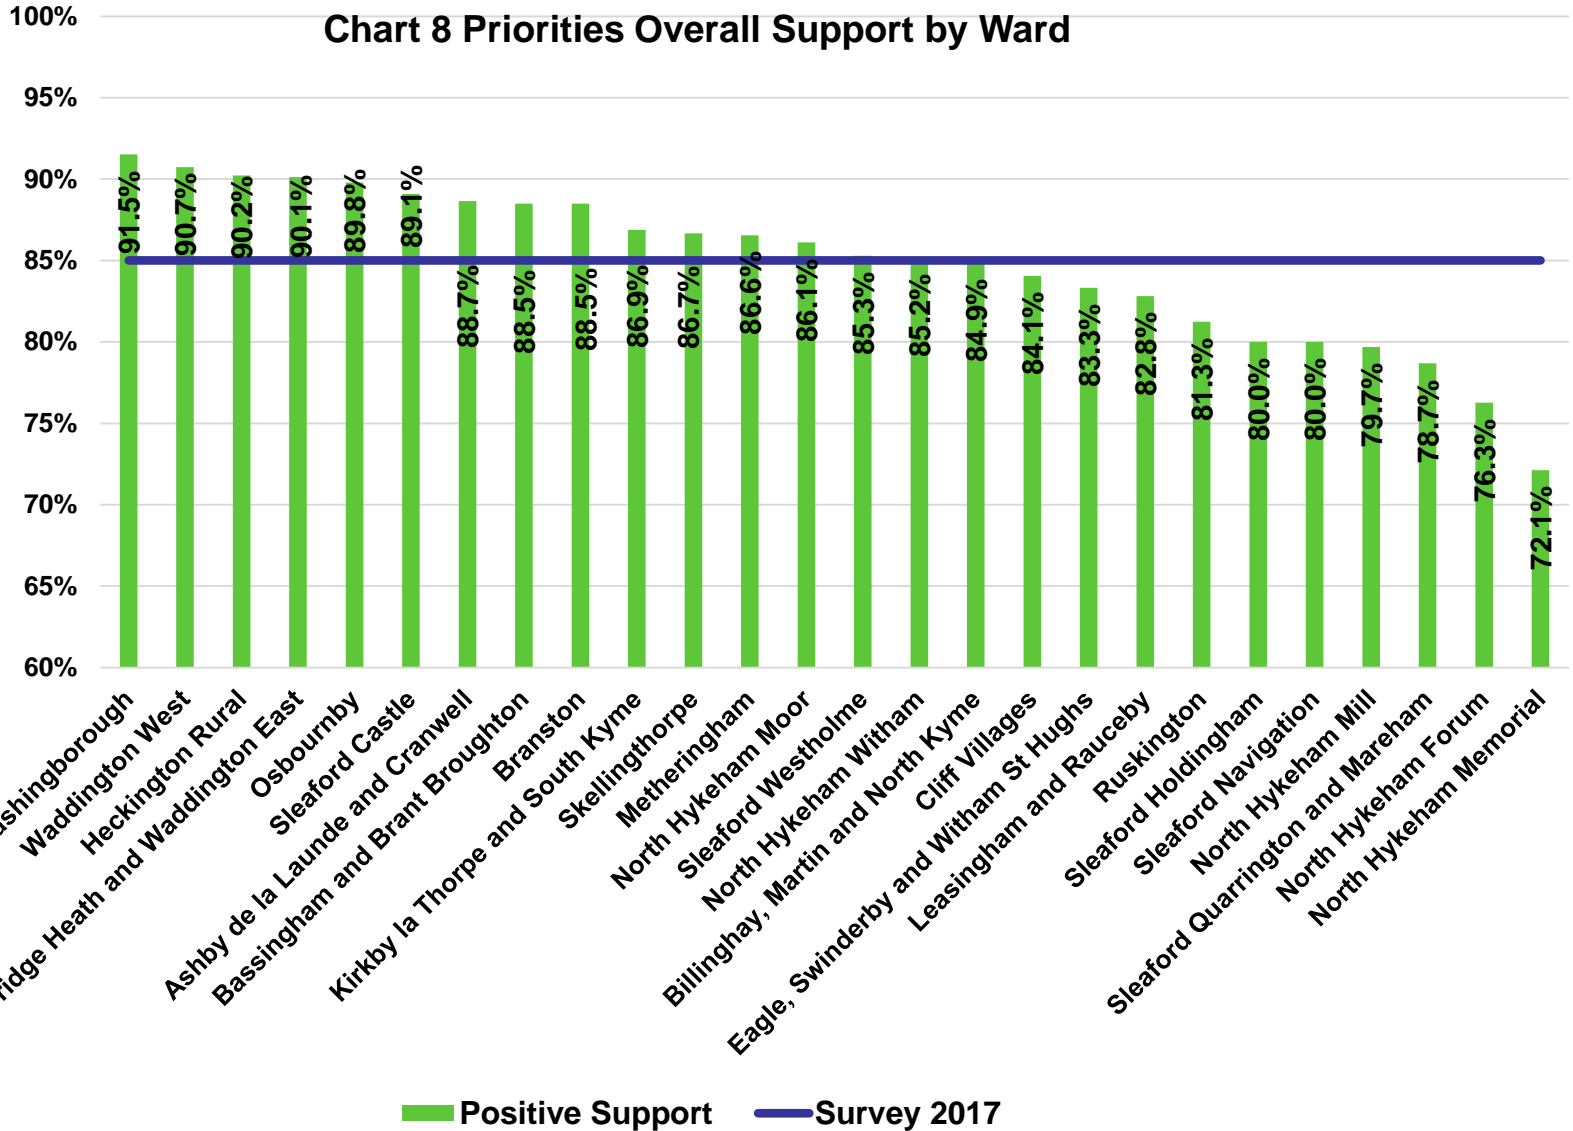

**Chart 7. Support for the Council's priorities by gender**

## Resident Survey Is the Council focused on the right things (2)

- Overall support for the proposed priorities by ward showed slightly more variance. 15 wards scored higher than the overall survey result, with 11 scoring below this. 7 of these scored 80% or higher, with the two further in the very high 70s. The lowest support, albeit still at 72.1%, was in the North Hykeham Memorial ward.

## Resident Survey: Issues of most importance and needing most improvement

- As in the 2015 survey respondents were asked to select from a list of 22 options – based on the STEEPLED SWOT analysis – the five areas that were most important to them and the five areas that they felt needed the most improvement. The most and least frequently selected options are shown in the table below.

Issues most important to you.			Issues needing the most improvement in your local area		
<b>Top 5</b>			<b>Top 5</b>		
1	Traffic Congestion / Road Network	58%	1	Traffic Congestion / Road Network	57%
2	Crime & ASB	50%	2	Support Services for people who need help	35%
3	Health Issues	37%	3	Crime & ASB	32%
4	Services that are value for money	35%	4	Availability of affordable housing	30%
5	Support Services for people who need help	35%	5	Access to Public Transport	30%
<b>Bottom 5</b>			<b>Bottom 5</b>		
18	Climate change	11%	18	Easy access to Council Services	10%
19	Easy access to Council services	10%	19	Going to watch cultural activities	9%
20	Going to watch cultural activities	9%	20	Climate Change	9%
21	Participation in sporting activities	5%	21	Participation in cultural activities	6%
22	Participation in cultural activities	5%	22	Participation in sporting activities	6%

- In terms of importance the same issues as in 2015 are again in both the top and bottom five this year. Likewise the five issues in the bottom for needing most improvement are also unchanged. However **availability of affordable housing** is now ranked by residents within the top 5 issues most in need of improvement **replacing services which are value for money** which has fallen to 9<sup>th</sup>.
- Thereafter the document sets out the overall importance : improvement matrix; demonstrates how the issues identified as most important and most in need of improvement are reflected in the NK Plan 2018-21; provides the full comparison with the 2015 results; and a further level of analysis by gender, age, and council ward. The “top” and “bottom” five are highlighted for each of these groups, plus any significant changes are shown in red / blue text

# 2017 Resident Survey Results : Most Important : Needs Most Improvement Matrix

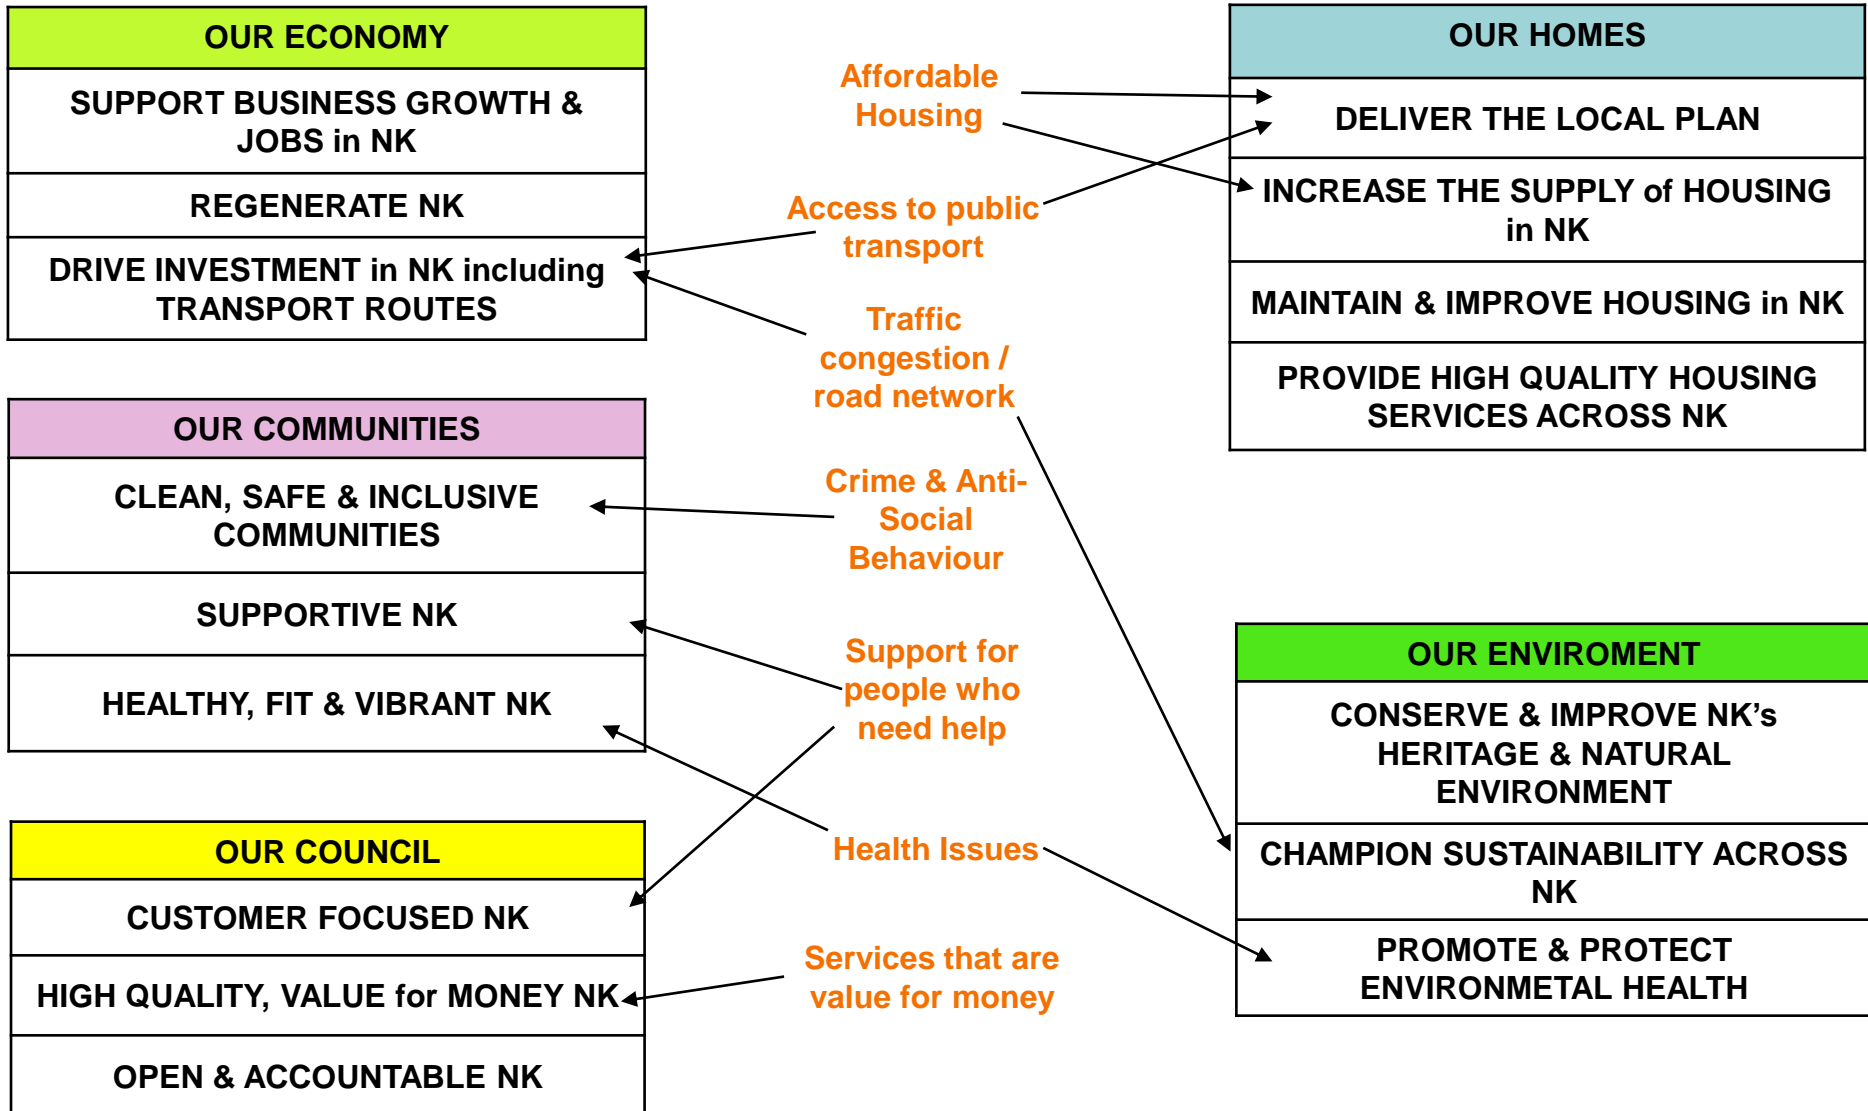

Priorities Key

- Our Economy
- Our Homes
- Our Communities
- Our Environment
- Our Council

# Resident Survey Results : Issues of most importance and needing most improvement : Where these are addressed in the proposed NK Plan 2018-21

The diagram below demonstrates how the 7 issues identified as either or both most important and needing most improvement are already identified in the proposed Priorities and Ambitions within the NK Plan 2018-21

# Resident Survey: Issues of most importance and needing most improvement

An overall comparison with 2015, plus detailed results by gender, age, and ward are set out in the following tables:

➤ **Table 3:**

- 2017 vs 2015 comparison and movement for issues most important; most in need of improvement

➤ **Table 4:**

- Issues that are most important breakdown by gender and age bands

➤ **Table 5:**

- Issues that are most in need of improvement breakdown by gender and age bands

➤ **Table 6.1 to 6.5**

- Issues that are most important breakdown by Ward;
  - 6.1 Ashby de Launde and Cranwell; Bassingham and Brant Broughton; Billingham, Martin, and North Kyme, Bracebridge Heath and Waddington East; Branston; Waddington West
  - 6.2 Cliff Villages; Eagle, Swinderby and Witham St Hughs; Heckington Rural; Heighington and Washingborough; Kirkby-La-Thorpe and South Kyme
  - 6.3 Leasingham and Rauceby; Metheringham; Osbournby; Ruskington; Skellingthorpe
  - 6.4 All North Hykeham wards
  - 6.5 All Sleaford wards

➤ **Tables 7.1 to 7.5**

- Issues that need most improvement breakdown by Ward
  - 7.1 Ashby de Launde and Cranwell; Bassingham and Brant Broughton; Billingham, Martin, and North Kyme, Bracebridge Heath and Waddington East; Branston; Waddington West
  - 7.2 Cliff Villages; Eagle, Swinderby and Witham St Hughs; Heckington Rural; Heighington and Washingborough; Kirkby-La-Thorpe and South Kyme
  - 7.3 Leasingham and Rauceby; Metheringham; Osbournby; Ruskington; Skellingthorpe
  - 7.4 All North Hykeham wards
  - 7.5 All Sleaford wards

## SECTION 2 : STAKEHOLDER GROUPS

### Highlights

- 8 stakeholder sessions attended by 103 people
- Consistency in the Strategic Driver and Priority seen as most important – Employment and Our Economy – as compared with both last year, and the year prior to that.
- Employment ranked either 1<sup>st</sup> or 2<sup>nd</sup> by all 8 stakeholder groups
- Consistently positive feedback in terms of the three questions posed with all scoring over 70% positive.
- 98% agreed that ***the Council is focused on the right things***, a very high rating and higher again as compared with 2016
- ***Capacity to deliver*** saw a 11 point drop to 72% as compared with 2015, decreasing from 83%. However this still compares very positively with the 59% agreement level when the question was first posed in 2012.
- ***Clarity on benefits*** scored strongly at 88%, a slight increase as compared to last year, and again well ahead of the 74% when the question was first posed in 2012
- At the group level 100% agreement with the addition of Our Environment as a fifth priority for the NK Plan
- At an individual stakeholder level
  - 88.5% positive
  - 8.7% neutral / unsure
  - 2.8% negative96.8% positive for those with a clear yes / no opinion
