Management Plan

Scope and Purpose

The main objectives of the management plan are to ensure the protection of what makes the conservation area special and to guide future development in a way that preserves and enhances the characteristics which make them worthy of protection. It will set out the tools available through Development Management and Planning Enforcement procedures in addition to policies designed to proactively manage change within the conservation area.

Management Policies

Article 4 Directions

Article 4 Directions are used to bring under planning control a range of works authorised by the Town & Country Planning (General Permitted Development) Order 1995 (as amended). They remove all, or in most cases selective, normal permitted development rights of householders to make changes to specific items considered to be contributing to the erosion of the character of many conservation areas.

Small scale, incremental changes such as the loss of traditional timber windows and doors and roof coverings such as slate and clay pantiles have been identified within the conservation area appraisal as having a harmful impact on the conservation area. In addition further changes such as the installation of roof-mounted solar panels also have the potential to harm the character and appearance of the conservation area. In order to address these issues it is proposed that a separate report will be produced and a public consultation exercise carried out to determine whether the introduction of a selective Article 4 Direction would be an appropriate course of action.

The purpose of the Article 4 Direction would be to prevent further harm to the conservation area and provide a means to reverse the harm which has already occurred.

Shopfronts and signage

There are a number of shops and businesses whose appearance makes an important contribution to the character and appearance of the conservation area, particularly on the High Street. Where such businesses are located in traditional buildings it is particularly important that shopfronts and/or signage respect the architectural and historic character of those buildings.

In response to similar issues being identified in other conservation areas within the District the Council has produced a shopfront design guide to assist developers and retailers in formulating sympathetic shopfront and advertisement designs which better respond to the traditional character and appearance of the District's historic town and village centres. It also covers issues such as security and lighting. In order to address the harm being caused to the historic environment the council will expect proposals for new or replacement shopfronts and signage to adhere to this guidance. In particular the use of traditional timber shopfronts and signage will be positively encouraged and the use of modern materials and signage will not be permitted where it would cause harm to the character and appearance of the conservation area. The Council expects applicants to make use of the design guide when preparing applications which involve shopfronts and/or signage, particularly on traditional buildings.

Green space, landscaping and public art

Green space and landscaping plays a vital role in forming the character and appearance of Waddington Conservation Area. Green verges, mature trees and private gardens all contribute to this and it is therefore important that these spaces are preserved and enhanced. The loss of green space and mature trees as a result of development will be resisted and the Council will seek to ensure their enhancement through the planning process wherever possible. There are a number of public art installations throughout the conservation area which help to enhance its local distinctiveness and interpret the history of the village. The Council will seek to support the retention and enhancement of these elements of the conservation area.

Design

The Appraisal identifies and defines the special characteristics of the conservation area including the general form, detailing, important views and open spaces. These elements should be retained, reinforced and enhanced where appropriate when development proposals are being formulated.

Any new development will be required to preserve and enhance the conservation area. This will be achieved by ensuring the scale, massing and architectural details and pattern of development respects and reflects that of the existing built environment.

Appropriate external materials and finishes will be expected on all new development. Traditional materials typical of the conservation area will normally be expected and boundary treatments should follow the form of those existing in the area.

Development Management

There are no potential medium or large-scale residential or commercial development sites expected to come forward in Waddington in the near future, other than those already allocated in the adopted Central Lincolnshire Local Plan (CLLP) (which runs to 2036), and which is currently under review. The CLLP does not allocate any land within the Conservation Area for new residential or commercial development.

Therefore, future development within the Conservation Area is more likely to be in the form of small windfall infill sites or redevelopment of existing buildings. However, such piecemeal windfall development still has the potential to significantly affect the character and appearance of the conservation area.

The Council will seek to support development which preserves and enhances the character and appearance of the conservation area in accordance with local and national policy and guidance as outlined in the conservation area appraisal.

Planning Enforcement

Unauthorised works and breaches of planning control can cause significant harm to the quality of both the built environment and surrounding spaces within a Conservation Area. Examples include unauthorised alterations to a building or the use of non-approved materials, or development that materially differs from what has been approved all of which can individually or cumulatively erode the special character of a conservation area.

Where expedient, enforcement action is pursued by the District Planning Authority and is undertaken by the Compliance and Enforcement Team. The Council's Conservation function works with the Compliance and Enforcement Team to tackle any breaches of planning control and will use the appraisal and this management plan as a means of justification for the expediency of any action taken.

Opportunities for Enhancement

The Council seeks to preserve and enhance the special interest of its heritage assets, including Conservation Areas. This includes the preservation, restoration or enhancement of historic buildings, the enhancement of the public realm and the sympathetic redevelopment of sites that currently detract from the character and appearance of the Conservation Area.

With regard to future areas for enhancement in Waddington Conservation Area, the council supports the re-use, restoration or enhancement of historic buildings and sites within and around the Conservation Area.

The incremental loss of historic architectural fabric has been harmful to the special interest of the Conservation Area. The most obvious detrimental changes have been the replacement of traditional timber-framed windows with modern upvc, the loss of timber doors and the replacement of non-interlocking clay pantiles with concrete pantiles. The reinstatement of features such as these would be greatly beneficial to the character and appearance of the conservation area.

Aside from its buildings, Waddington Conservation Area's public realm would also benefit from improvements. Hard surfacing throughout the conservation area generally lacks distinction and standard tarmac surfaces are widely used. Although practical and effective, such uniform surfacing makes little contribution to a locally distinctive sense of place.

The loss of stone boundary walls, and the use of fencing in various materials and designs to increase the height of boundaries, has been harmful in some parts of the conservation area. In addition, overhead lines are particularly prominent in parts of the conservation area.

As part of its management strategy the Council will support:

- The use of bespoke public realm materials where appropriate, particularly hard surfacing
- The preservation and/or enhancement of the Conservation Area's significant buildings, sites and green spaces, including grass verges and boundary walls.
- The preservation and/or enhancement of historic architectural features, including traditional timber-framed windows, timber panel/plank doors, non-interlocking clay pantiles, lime render, brick chimney stacks, traditional shop fronts and signage (consistent with the Council's Shopfront Design Guide);
- The reintroduction of appropriate historic/traditional architectural features in the Conservation Area's buildings and public realm, such as timber joinery, natural clay pantiles (or natural slates where appropriate), cast iron street lamps, traditional walls, etc;
- The replacement of unsympathetic and dominating traffic signage;
- The reduction or removal of overhead lines;
- The retention of significant trees and where necessary (due to damage or loss) their replacement with appropriate species.

North Kesteven Heritage Grant Scheme

In order to help secure the preservation, enhancement and special interest of its heritage assets, including Conservation Areas, grant assistance of between £1,000 and £2,500 is available for works to historic buildings in North Kesteven. Funding is available to both residential and commercial buildings, and the aim of the scheme is to preserve and enhance the District's built heritage by encouraging the sympathetic repair of historic buildings. Works eligible for grant assistance include the repair, restoration or reinstatement of original windows and doors, brickwork and stonework repairs and repointing, repairs to chimneys and the repair or reinstatement of traditional boundary walls, railings and steps.

Further information, including the grant scheme terms and conditions, eligibility and the application form is available at <https://www.n-kesteven.gov.uk/residents/planning-and-building/planning/conservation-and-heritage/north-kesteven-heritage-grant-scheme/>
