

# **Central Lincolnshire**

## **Strategic Housing and Economic Land Availability Assessment (SHELAA)**

### **July 2015**

**Please note:**

This document supersedes the version published in October 2014 and includes sites submitted during the Local Plan consultation which took place in October/November 2014.

We have not included sites submitted that are less than 0.5ha for employment sites or for under 25 dwellings.

At this stage we are not committed to any sites identified in this document. The inclusion of a site in this document does not represent any decision by the Central Lincolnshire authorities and does not provide the site with any kind of planning status. They are sites promoted to us, not by us.

# Central Lincolnshire Strategic Housing and Economic Land Availability Assessment SHELAA 2015

---

## 1. Introduction

This is the Strategic Housing and Economic Land Availability Assessment (SHELAA) for Central Lincolnshire. It is a technical document that informs the Local Plan preparation, and will help to identify potential site allocations that may be required to meet future housing and employment need within Central Lincolnshire.

Central Lincolnshire covers the City of Lincoln, North Kesteven and West Lindsey. These three councils have come together to prepare a joint Local Plan for the area and this includes a joint evidence base.

In October and November 2014 we consulted on the [Preliminary Draft Local Plan](#) and an earlier version of the SHELAA was published alongside the draft Local Plan for comments. As part of the consultation we received over 100 new sites.

This document lists all sites with an estimated capacity of 25 dwellings or more or over 0.5ha for employment sites that have been suggested (See Section 4). All sites will be subsequently assessed against the site selection methodology as set out in Appendix A of the Local Plan. The preferred sites will be included in the next consultation draft of the Local Plan (summer 2015).

**The sites identified in this document are not in any way ‘approved’ or supported by the Central Lincolnshire authorities; they are merely a collection of sites as submitted by developers or landowners.**

All sites will be fully assessed against the detailed site selection methodology. We will publish a report alongside the next version of the Local Plan that will identify all sites suggested to us and will include a full reason and justification for the proposed selection of a site or not.

The timetable for the production of the Local Plan is set out below. This also includes the stages involved in the site selection and site assessment process.

October 2014	Local Plan consultation and call for sites
December 2014 to May 2015	Site selection and assessment process
Autumn 2015	Consultation on draft Local Plan including preferred sites
January 2016	Final Local Plan public consultation.
April to September 2016	Examination of Local Plan
November 2016	Adoption of Local Plan

# Central Lincolnshire Strategic Housing and Economic Land Availability Assessment SHELAA 2015

---

## 2. National Policy

The [National Planning Policy Framework](#) (NPPF)<sup>1</sup> requires councils to have a 'clear understanding of housing need in their area and should prepare a Strategic Housing Land Availability Assessment (SHLAA) to establish realistic assumptions about the availability, suitability and likely economic viability of land to meet the identified need for housing over the plan period'.

The Central Lincolnshire authorities have produced a land availability assessment that also incorporates employment sites. This new report is called SHELAA and supersedes and updates the previous SHLAAs produced by the Central Lincolnshire authorities. In all other respects it meets the same purposes as a SHLAA and we have followed the requirements of the NPPF and approach set out in the [National Planning Practice Guidance](#)<sup>2</sup> in preparing this document.

This approach is supported by national policy and guidance. There are a number of advantages to carrying land assessments for housing and employment as part of the same exercise. This provides better links to the Local Plan and the site assessment process and allows sites to be assessed for a mix of different uses to make sure a site is allocated for the most appropriate uses.

---

## 3. Methodology

National guidance requires land availability assessments to:

- identify sites and broad locations with potential for development;
- assess their development potential;
- assess their suitability for development and the likelihood of development coming forward (the availability and achievability).

The diagram on the following page identifies the different stages involved in preparing a land assessment, and how this links with the site assessment and selection process. We are currently at Stage 1 and are in the process of identifying sites and broad locations for future growth.

This assessment is an important evidence source to inform plan making. This assessment identifies all sites and broad locations that have been suggested for future development to provide an audit of available land. Sites which have particular policy constraints should be included in the assessment for the sake of comprehensiveness.

It is not the role of this documents to determine whether a site should be allocated for development or not. Its role is to provide information on the range of sites that are available. It is for the Local Plan to determine which of the sites are the most suitable to meet the future needs for Central Lincolnshire taking into account policy constraints.

The decision to allocate a site for development in the Local Plan requires detailed site assessment process and in-depth study of the nature and potential of all sites identified in this report. Each site must be compared and assessed against reasonable alternatives, in order to determine which sites offer the most suitable solution to meet identified future need. Any constraints identified must be set out clearly, including where they severely restrict development.

The process of identifying suitable sites is as follows:

- **Stage 1 – Site/broad locations identification.**

We are currently at the first stage in the process. This document identifies all sites and broad locations that have been suggested as potential location for future growth.

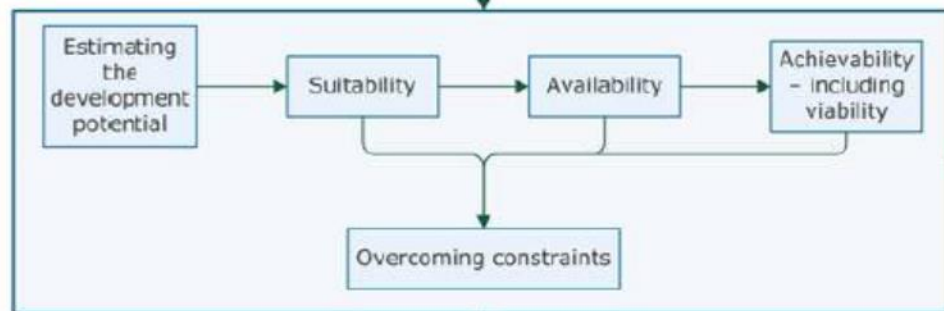

At this stage no assessment has been carried out and no preference is attached to any site listed in this document. All sites have been published to make the process transparent. The inclusion of a site in this document does not represent a decision by the Central Lincolnshire authorities and does not provide the site any planning status.

# Central Lincolnshire Strategic Housing and Economic Land Availability Assessment SHELAA 2015

## Stage 1- Site / broad location identification

## Stage 2 - Site / broad location assessment

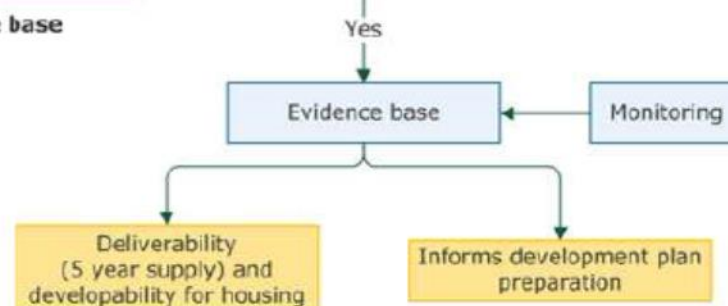

## Stage 3 - Windfall assessment

## Stage 4 - Assessment review

## Stage 5 - Final evidence base

## Central Lincolnshire Strategic Housing and Economic Land Availability Assessment SHELAA 2015

---

The only criteria that has been applied at this stage is the site size threshold. Any sites under 0.5ha or sites with an estimated capacity of less than 25 dwellings have not been included in this report. Any new sites suggested that are below this threshold are will not be assessed as a potential allocation.

- **Stage 2 Site/broad location assessment**

All sites suggested will be fully assessed against the detailed assessment criteria. The site assessment process will link closely to the Integrated Impact Assessment (IIA), which incorporates the requirements of Sustainability Appraisal as required by Government legislation. The IIA objectives mirror the proposed assessment methodology.

The site assessment process will include a detailed desk based data collection process to identify any constraints. This will include the use of extensive mapped information held on Geographical Information System (GIS), to develop an overall picture of each site, its key characteristics and surrounding areas to provide an initial assessment of site suitability. We will also carry out a review of all sites using planning history and existing local reports and other evidence documents.

Every reasonable site will be visited by a member of the Local Plans team.

The site assessment process will be split into three stages:

1. **Proximity Test:** all sites will be assessed against a range of distance criteria, mainly held on GIS, to allow comparison against key criteria e.g. located adjacent or within a flood risk area.
2. **Professional Assessment:** Advice from specialist officers within the three districts and the county council, such as Transport, Education, and Natural Environment teams, as well as advice from other organisations such as Natural England, the Environment Agency and English Heritage.
3. **Site Selection process:** All reasonable alternative sites will be compared and discussed in detail by members of the Local Plans team to recommend the most suitable and sustainable sites to meet the growth requirements of the Local Plan. The Central Lincolnshire Joint Strategic Planning Committee will make the final decision on which sites should be put forward in the next draft of the Local Plan).

The following factors should be considered to assess a site's suitability for development now or in the future:

- physical limitations or problems such as access, infrastructure, ground conditions, flood risk, hazardous risks, pollution or contamination;
- potential impacts including the effect upon landscapes including landscape features, nature and heritage conservation;
- appropriateness and likely market attractiveness for the type of development proposed;
- contribution to regeneration priority areas;
- Environmental/amenity impacts experienced by would be occupiers and neighbouring areas.
- Deliverability will also be a key factor as to whether a site will be allocated or not.

# **Central Lincolnshire Strategic Housing and Economic Land Availability Assessment SHELAA 2015**

---

- **Stage 3 - Windfall assessment**

The NPPF<sup>3</sup> states that a windfall allowances may be included as part of the supply of housing if there is compelling evidence.

For Central Lincolnshire the Local Plan is proposing to not allocate any sites less than 25 dwellings or any employment sites under 0.5ha. This means that any sites under 25 dwellings will be classified as windfall development.

Evidence of housing completions over the last five years indicates a high proportion of development under 25 dwellings, with many sites for 1 or 2 houses in rural areas. It is expected that this trend will continue in the future, particularly as it is proposed that the Local Plan will not define settlement boundaries.

Therefore, there is justification for the Local Plan to include an element of windfall development as part of the overall housing need. This windfall allowance will be set out in the next version of the Local Plan.

- **Stage 4 - Assessment review**

Once we have completed the site assessment process, set out in stage 2, we can move on to identifying the allocated sites to be included in the Local Plan.

From the initial site assessment we should be able to rule out any unsuitable sites that have major constraints which cannot be easily overcome, such as sites located in areas at risk of flooding.

All the remaining reasonable alternative sites will be reassessed and compared against each other to identify the most sustainable sites and most appropriate locations for future growth in Central Lincolnshire.

There may be several suitable sites in a settlement that may appear to be equally appropriate, but only one site is needed, in which case it will come down to a matter of judgment as to which is the most suitable, taking into account specific local factors.

- **Stage 5 –Final evidence base**

The full site assessment process will be published in a report to support the next version of the Local Plan (Summer 2015). This document will set out clearly how each site has been assessed and how it has scored against each criteria. The report will provide the evidence to support the allocation of a site in the Local Plan.

---

<sup>3</sup> Paragraph 48

---

## **4. Site Profiles**

This section provides a page summary (profile) of all sites suggested.

At this stage no assessment has been carried out and no commitment is made.

However, it is important to note that these sites are not in any way 'approved' or supported by the Lincolnshire authorities; they are merely a collection of sites as submitted by developers. Nevertheless, they act as a starting point for finding any sites.
