# 1. INTRODUCTION

- 1.1. The National Planning Policy Framework (NPPF) includes a requirement for local planning authorities to identify and update annually a supply of specific deliverable sites sufficient to provide five years' worth of housing against their housing requirements.
- 1.2. This report sets out the five year land supply position for Central Lincolnshire for the period 2022 to 2027. The 'current year' (2021/22) is not used in the calculation of the five year supply. This is to ensure that at any point during the current year the Five Year Land Supply Report will include a full five year supply of land. This report is based on monitoring data as at 31 March 2021 and as provided by each district within Central Lincolnshire.
- 1.3. This report sets out the details of:
  - the national and local policy context for calculating the five year supply;
  - the housing requirement for Central Lincolnshire during the five year period taking into account any necessary past undersupply and buffers as required by national policy;
  - the anticipated supply of homes across Central Lincolnshire in the five year period; and
  - the calculation of the five year housing land supply position for Central Lincolnshire.

# 2. POLICY CONTEXT

## NATIONAL CONTEXT

- 2.1. The NPPF was originally published in 2012 and was subsequently revised in July 2018, February 2019 and July 2021. The revised NPPF included substantive amendments to the policy requirements in relation to housing land supply and it also introduced a number of other new policy requirements relating to plan-making and decision taking.
- 2.2. Paragraph 74 of the NPPF requires local planning authorities to identify and update annually a supply of "*specific deliverable sites sufficient to provide a minimum of five years' worth of housing against their housing requirement set out in adopted strategic policies.*"
- 2.3. The NPPF goes on to define what is to be considered 'deliverable' in its glossary:

*"To be considered deliverable, sites for housing should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years. In particular:*

*a) sites which do not involve major development and have planning permission, and all sites with detailed planning permission, should be considered deliverable*

*until permission expires, unless there is clear evidence that homes will not be delivered within five years (for example because they are no longer viable, there is no longer a demand for the type of units or sites have long term phasing plans).*

*b) where a site has outline planning permission for major development, has been allocated in a development plan, has a grant of permission in principle, or is identified on a brownfield register, it should only be considered deliverable where there is clear evidence that housing completions will begin on site within five years.”*

- 2.4. Paragraph 73 also requires local planning authorities to “include a buffer (moved forward from later in the plan period) of:
- a) 5% to ensure choice and competition in the market for land; or
  - b) 10% where the local planning authority wishes to demonstrate a five year supply of deliverable sites through an annual position statement or recently adopted plan, to account for any fluctuations in the market during that year; or
  - c) 20% where there has been significant under delivery of housing over the previous three years, to improve the prospect of achieving the planned supply.”
- 2.5. The NPPF stipulates in footnote 41 that the 20% buffer in option c) is measured against the Housing Delivery Test, where this indicates that delivery was below 85% of the housing requirement.
- 2.6. The NPPF also allows for incorporation of a windfall allowance in the five year period in paragraph 71, where there is compelling evidence that they will provide a reliable source of supply. Any windfall allowance should be realistic having regard to the strategic housing land availability assessment, historic delivery rates and expected future trends.
- 2.7. Additional planning guidance is provided in the National Planning Practice Guidance (PPG), originally introduced in 2014. In July 2019 the Government updated much of its [Guidance on 5 year housing land supply and Housing Delivery Test](#).
- 2.8. The PPG builds on the requirements of the NPPF providing substantial detail of what is expected of local planning authorities in order to demonstrate a five year supply of housing. This five year land supply report seeks to satisfy the requirements of both the new NPPF and the detailed guidance. Rather than duplicating the guidance here specific reference to national policy and guidance is drawn out in relevant sections detailing the Central Lincolnshire five year land supply position in this report.

## THE LOCAL CONTEXT

- 2.9. The Central Lincolnshire Local Plan was adopted on 28 April 2017, covering the period 2012-2036. It is a joint plan covering the administrative areas of City of Lincoln, North Kesteven and West Lindsey.
- 2.10. The Local Plan introduced a housing requirement for Central Lincolnshire of 36,960 dwellings across the plan period which equates to 1,540 dwellings per year. This housing requirement is a Central Lincolnshire requirement and it has not been divided up into separate requirements for each of the local planning authorities in the area.
- 2.11. The Local Plan allocates more than 100 sites ranging from 25 dwellings in size to the sustainable urban extensions, the largest of which is anticipated to deliver

approximately 6,000 homes and supporting infrastructure for the area. These sites are located in the top four tiers of the settlement hierarchy (Lincoln Urban Area, Main Towns, Market Towns and Large Villages) and only sites of 25 or larger were considered for allocation.

- 2.12. Sites coming forward lower down in the settlement hierarchy, specifically in 'Medium Villages' and 'Small Villages' do not have sites allocated. Instead through policies LP2 and LP4 a growth level was established for each village to understand the amount of development that could take place depending upon the size of the settlement and the services available. Sites delivered through these flexible policies make up an important part of the supply, and are accounted for as windfall, taking into account the permissions granted and homes built as detailed in this report.
- 2.13. Furthermore, a substantial part of the housing supply comes from small sites in urban areas. Local Plan Policy LP2 supports the principle of delivery of new homes in the top four tiers of the settlement hierarchy. However, as is detailed in this report, account has only been taken of small sites in the Lincoln Urban Area, meaning that no windfall assumptions have been made about small sites in the Main Towns, Market Towns or Large Villages.
- 2.14. The Local Plan is currently being reviewed and updated with Regulation 18 Consultation taking place in summer 2021. Whilst the emerging Local Plan proposes a suite of new policies including new site allocations, a revised approach to growth in villages and more, this report does not take account of such changes at this time, but future updates will look to be adjusted to take account of the new Local Plan at the appropriate time when it progresses through examination.

### 3. THE FIVE YEAR REQUIREMENT

- 3.1. Paragraph 74 of the NPPF and 003 of the PPG<sup>1</sup> make it clear that for areas with a Local Plan that has been adopted within the last five years, the housing requirement set out in the strategic policies should be used for calculating the five year supply.
- 3.2. The Central Lincolnshire Local Plan identifies a housing requirement for 36,960 dwellings between 2012 and 2036 (or 1,540 dwellings per year over the 24 year plan period). This requirement was based on evidence in the Strategic Housing Market Assessment (SHMA) July 2015.

**The basic five year land supply requirement between 2012 and 2036 is therefore 7,700 dwellings, as summarised in Table 1.**

*Table 1: The Basic Five Year Land supply requirement 2021 to 2026*

a	Housing Requirement 1 April 2012 to 31 March 2036 (24 year period)	36,960	
b	Average per year	1,540	a ÷ 24

## PAST COMPLETIONS AND SHORTFALL/SURPLUS

- 3.3. However, the PPG also requires that any past shortfalls should also be taken into account in the five year supply. For Central Lincolnshire this means looking at completions since the start date of the Local Plan (1 April 2012), and any under or over-supply during that period. Between 1 April 2012 and 31 March 2021 a total of 8,700 dwellings were completed as is shown in Table 2 below.

Table 2: Completions 2012 to 2019

District	2012/13	2013/14	2014/15	2015/16	2016/17	2017/18	2018/19	2019/20	2020/21	Total
City of Lincoln	233	236	166	235	188	191	346	205	167	1,967
West Lindsey	256	289	378	284	300	259	407	573	485	3,231
North Kesteven	348	379	458	473	468	577	698	760	469	4,630
<b>Total</b>	<b>837</b>	<b>904</b>	<b>1,002</b>	<b>992</b>	<b>956</b>	<b>1,027</b>	<b>1,451</b>	<b>1,538</b>	<b>1,121</b>	<b>9,828</b>

- 3.4. This represents an undersupply of 4,032 dwellings when compared against the basic requirement of 1,540 dwellings per year (13,860 dwellings over a 9 year period).
- 3.5. However, the new NPPF and PPG allows account to be taken of delivery of student and other communal accommodation, based on the amount of housing they free up to the market.
- 3.6. Paragraph 34 of the Housing Supply and Delivery section of the PPG states:

*“All student accommodation, whether it consists of communal halls of residence or self-contained dwellings, and whether or not it is on campus, can in principle count towards contributing to an authority’s housing land supply based on:*

- the amount of accommodation that new student housing releases in the wider housing market (by allowing existing properties to return to general residential use); and / or*
- the extent to which it allows general market housing to remain in such use, rather than being converted for use as student accommodation.*

*This will need to be applied to both communal establishments and to multi bedroom self-contained student flats. Several units of purpose-built student accommodation may be needed to replace a house which may have accommodated several students.*

*Authorities will need to base their calculations on the average number of students living in student only accommodation, using the published census data, and take steps to avoid double-counting. The exception to this approach is studio flats designed for students, graduates or young professionals, which*

*can be counted on a one for one basis. A studio flat is a one-room apartment with kitchen facilities and a separate bathroom that fully functions as an independent dwelling.”<sup>2</sup>*

- 3.7. Paragraph 35 of the same section of the PPG also goes onto make an allowance for housing for older people, where it says:

*“Local planning authorities will need to count housing provided for older people, including residential institutions in Use Class C2, as part of their housing land supply. This contribution is based on the amount of accommodation released in the housing market. Further guidance is set out in Housing for Older and Disabled People.”<sup>3</sup>*

- 3.8. As such it is wholly appropriate to factor in development for student and other communal accommodation into the housing supply. The calculations required to be applied to these types of accommodation have been calculated and are set out in Appendix A. The ratios applied to the different types of accommodation are shown in Table 3:

*Table 3: Student accommodation and residential institutions ratios*

District	Student dwelling ratio	Residential institution ratio
City of Lincoln	2.90	1.8
North Kesteven	2.26	1.8
West Lindsey	2.01	1.8

- 3.9. A number of schemes have been delivered since the start of the Local Plan period in 2012, but monitoring of these types only goes back to 2015 in line with the Government data requests for the Housing Delivery Test. The delivery of bedrooms in student accommodation and residential institutions since 2015 is shown in Table 4 alongside the number of dwellings freed up to the market:

*Table 4: No of dwellings freed up to the market*

Year	Type	City of Lincoln	North Kesteven	West Lindsey	Conversion using ratio <sup>4</sup>

	Residential Institution			7	<b>4</b>
Total	Student accommodation	2,188	0	0	<b>755</b>
	Residential Institution	125	109	50	<b>159</b>

- 3.10. Table 4 shows that a total of 914 dwellings have been released to the market through the delivery of student accommodation and residential institutions since 2015/16. The detail of permissions which make up the supply of student accommodation and residential institutions are included in Appendix B.
- 3.11. When the amount of homes freed up to the market as a result of student accommodation and residential institutions being delivered, are added to the past supply of dwellings since 2012, this gives a shortfall of 3,118 dwellings between 1 April 2012 and 31 March 2021 as is shown in Table 5.

g	Surplus / shortfall for 1 April 2012 to 31 March 2020	-3,118	d + e - f

## ESTIMATES FOR THE CURRENT YEAR AND SHORTFALL/SURPLUS

- 3.12. An estimate of the supply against the requirement for the current year 2021/22 also needs to be factored in. It is estimated that 1,556 dwellings will be delivered in the current year (2021/22)<sup>5</sup>. This represents a surplus of 16 dwellings when compared against the requirement for 1,540. However, as is detailed above and in Appendix C4, the changes to the PPG allow for development of communal accommodation to be taken into account. It is expected that these forms of development will deliver 1,502 bedrooms in 2021/22 which will allow for the release of 529 dwellings to the market (using the government methodology). This increases the expected delivery in 2021/22 to 2,048 – a surplus of 545 dwellings. This surplus needs to be added into the calculations.
- 3.13. During the examination of the Central Lincolnshire Local Plan, the Inspectors approved the use of the 'Liverpool' method of dealing with the shortfall in Central Lincolnshire. This means that the shortfall can be spread across the remaining years of the plan period to 2036. When the total shortfall from 2012-2022 of 2,573 dwellings is spread across the remaining years of the plan period from 2022/23-

<sup>5</sup> This figure is informed by evidence received from the development industry operating in Central Lincolnshire including Housing supply returns and other evidence gathered over the past year and takes into account expected ongoing impacts of Covid-19.

2035/36 this results in 184 dwellings per year being added to the annualised housing requirement of 1,540 dwellings. This results in a new requirement of 1,724 dwellings per year. Over the five year period this adds an additional 919 dwellings to the requirement increasing it from 7,700 dwellings to 8,619 as shown in Table 6.

<b>m</b>	Five year requirement taking into account shortfall	8,619	$c \pm l$

## ADDING BUFFERS

- 3.14. In addition to the five year requirement, paragraph 74 of the NPPF requires local authorities to include a 5% buffer to ensure choice and competition in the market for land; or 10% where the local planning authority wishes to demonstrate a five year supply through an annual position statement or recently adopted plan, to account for any fluctuations in the market during that year; or where there has been a record of persistent under-delivery of housing, the buffer should be increased to 20%. Footnote 41 of the NPPF makes it clear that persistent under-delivery will be measured against the Housing Delivery Test (HDT).
- 3.15. It is made clear in the NPPF that these buffers are moved forward from later in the plan period and is not an additional requirement for more housing. The PPG also makes clear in paragraph 022<sup>6</sup> that only one of the buffers should apply and that they are not cumulative.
- 3.16. The PPG and the HDT Rule Book detail the process for calculating HDT. This introduces a delivery test across the past three years to consider how much housing has been delivered against the housing requirement. Paragraph 12 of the HDT Rule Book also makes it clear that, for the purposes of the HDT, the housing requirement to be used is the lower of the adopted housing requirement in a Local Plan or the annual local housing need figure – based on a national standardised method of calculating local housing need.
- 3.17. The most recent Housing Delivery Test was published in January 2021 and this confirmed that the Central Lincolnshire Authorities had delivered 149% of the requirement and as such a **5% buffer** should be applied to the five year requirement.
- 3.18. In relation to this year's calculation the Minister of State for Housing issued a [Written Ministerial Statement](#) in relation to the Covid-19 pandemic and its impacts on the delivery of housing. This statement recognises the impact that the national lockdowns and other pandemic-related disruption has caused the development industry in clarifying that the 2021 HDT calculation will include a four month (122 day) adjustment to the housing requirements in 2020-21, this is on top of the one month (31 day) adjustment applied to the calculation in 2019-2020.

<sup>6</sup> Reference ID: 68-022-20190722

- 3.19. Given that Central Lincolnshire delivered 1,121 dwellings and a further relative release of 324 dwellings from the delivery of student and other communal accommodation – making a total of 1,445 dwellings in 2020/21 – it is clear that the HDT will be passed this year as the Local Housing Need figure for 2020/21 was 1,086 dwellings before any discount was made for the Covid-19 pandemic.
- 3.20. The HDT calculation is usually published at the end of the year and the Written Ministerial Statement confirmed that this is the intention this year too. It is expected that Central Lincolnshire will continue to meet the HDT with an increase to 172% of the LHN being delivered across the three year period and will therefore retain a 5% buffer for this year's calculation. This buffer should be added against both the basic housing requirement and any shortfalls in the plan period as is made clear in paragraph 022 of the PPG<sup>7</sup>.
- 3.21. Table 7 shows the application of the 5% buffer on the housing requirement across the five year period.

*Table 7: Five year requirement including shortfall and buffer*

n	Buffer – 5%	431	$m \times 0.05$
o	Five year requirement taking into account shortfall and buffer	9,050	$m + n$
p	Average requirement per year	1,810	$o \div 5$

**The five year land requirement for 2022 to 2027 is therefore 9,050 dwellings.**

## 4. THE FIVE YEAR SUPPLY

- 4.1. Now that the requirement is known, taking into account shortfall and buffers, it is necessary to assess the supply of deliverable housing sites in Central Lincolnshire.

### SITES IN THE SUPPLY

- 4.2. As is detailed in the NPPF, only deliverable sites can be included. For a site to be considered deliverable it '*should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years*'.
- 4.3. Deliverable sites can come from a range of sources of information, for example through allocations in the Local Plan, or sites where full or outline permission have been granted, for example. Through monitoring it is possible to present robust, up to date information on the sites that make up the Central Lincolnshire land supply, and to understand which sites are deliverable and how many homes will be delivered in the five year period.
- 4.4. The NPPF glossary details that for sites that are not major development (i.e. fewer than 10 dwellings, or smaller than 0.5 hectares in size) and for sites where detailed

<sup>7</sup> Reference ID: 68-022-20190722

planning permission has been granted, these should be considered deliverable until such time as permission expires, unless there is clear evidence that they are no longer deliverable. The glossary and the revised PPG stipulates that sites of 10 or more dwellings (or 0.5 hectares or larger), or without detailed planning permission should only be considered deliverable where there is evidence that housing completions will begin on site within 5 years.

- 4.5. The Central Lincolnshire Five Year Land Supply is made up of sites that accord with the NPPF requirements including sites with permission and sites allocated in the adopted Local Plan. Officers at North Kesteven, West Lindsey and City of Lincoln have assessed each of the individual sites with regards to the expected timescales for delivery. This assessments has included an extensive consultation of land owners, developers and agents representing sites in the supply.
- 4.6. Appendix C provides a list of all sites included in the five year supply and the expected delivery rate. These are separated out according to the site status as follows:
- Non-major development sites (i.e. fewer than 10 dwellings or smaller than 0.5 hectares);
  - Major development sites with detailed permission granted; and
  - Major development sites with outline permission granted or that are allocated without permission at this time.

More information is provided against sites with outline permission and sites without permission at this time where they are expected to deliver within the five year period. There are also many sites which are not included in the five year supply, due to an absence of evidence that they will be delivered within the five year period. Many of these sites are unconstrained and could also come forward within the five year period. Officers will continue to liaise with land owners, agents and developers to understand the latest position on sites in the supply.

- 4.7. In considering the timings and delivery rates of sites, officers have made contact with builders, agents and land owners of sites to understand their anticipated delivery, including to take account of the impacts of the Covid-19 pandemic. Typically where information obtained provides a robust position for a site's delivery, this information has been used to inform a site's trajectory.
- 4.8. In order to test the expected delivery timescales and build rates, a number of assumptions have been developed based on experience with real world example sites across Central Lincolnshire. These assumptions are set out in the accompanying Central Lincolnshire Housing Assumptions Report, October 2019.
- 4.9. In Appendix C, where a site already has planning permission, the dwelling figure is that for which permission was granted. Where a site is under construction, the outstanding dwelling figure shown is the remaining number still to be completed (at 1 April 2021) in accordance with the permission. For sites that are allocated but do not yet have planning permission the figure used is the 'indicative dwelling' set out in the adopted Central Lincolnshire Local Plan, unless through other discussions

with land owners or through pre-application discussion or a live planning application it is clear that an alternative capacity is more appropriate.

- 4.10. As detailed in section 3, account should be taken of the delivery of student accommodation and residential institutions in terms of the number of homes released to the market. By using the Government ratios, provided in Table 3, a figure can be incorporated into the five year supply resulting from such developments.
- 4.11. There are a number of sites with permission for student accommodation or for a residential institution across Central Lincolnshire, many of which are expected to be delivered this year (2021/22) or within the 5 year period (2022/23-2026/27). These developments are expected to free up a total of 529 dwellings to the market in 2021/22 and a further 259 dwellings in the five year period as is shown in Table 8.

*Table 8: No. of bedrooms with permission in communal accommodation and no. of dwellings released.*

District	Student bedrooms	Dwellings released <sup>8</sup>	Communal accommodation	Dwellings released <sup>9</sup>	Total dwellings released
City of Lincoln	2,019	696	0	0	696
North Kesteven	0	0	24	13	13
West Lindsey	81	40	68	38	78
Total	2,100	736	92	51	787

- 4.12. Details of sites making up the supply of student accommodation and residential institutions is provided in Appendix C4.

## WINDFALL ALLOWANCE

- 4.13. The NPPF<sup>10</sup> states that '*where an allowance is to be made for windfall sites as part of anticipated supply, there should be compelling evidence that they will provide a reliable source of supply. Any allowance should be realistic having regard to the strategic housing land availability assessment, historic windfall delivery rates and expected future trends*'. The Local Plan allocates sites of 25 dwellings or more, therefore there is justification for including a windfall allowance for small sites below 25 dwellings. The inclusion of these sources of windfall were endorsed by the Local Plan Inspectors.
- 4.14. This windfall allowance can be divided into two categories:

### Small Sites in the Lincoln Urban Area

- 4.15. An allowance of 75 dwellings per year for small sites, starting in 2023/24, is allowed for in the Lincoln urban area.

<sup>8</sup> Using the ratio 2.9:1 as detailed in Table 3.

<sup>9</sup> Using the ratio 1.8:1 and 2.01:1 as detailed in Table 3.

<sup>10</sup> NPPF revised July 2021 - Paragraph 71

- 4.16. This assumption covers small sites across the Lincoln Urban Area and it is based on previous completions on small sites solely within the administrative boundary of City of Lincoln. In the City of Lincoln sites of fewer than 25 dwellings have made up, and continue to make up, an important part of the land supply. The historic delivery on these sites is shown in Table 9.

*Table 9: Historic delivery on sites below 25 dwellings in the City of Lincoln*

06/07	07/08	08/09	09/10	10/11	11/12	12/13	13/14	14/15	15/16	16/17	17/18	18/19	19/20	20/21
113	128	187	102	88	257	75	98	104	136	101	94	64	111	145

- 4.17. This shows the consistency at which small sites come forward in the City of Lincoln with 75 dwellings being significantly below the mean average of 120 dwellings across the 15 year period.
- 4.18. Furthermore, this allowance does not include delivery on small sites in parts of the Lincoln urban area which are within North Kesteven and West Lindsey and for which Local Plan policies provide in-principle support for.
- 4.19. No windfall allowance on these small sites are included in years 2021/22 and 2022/23 as it is assumed that they would already have planning permission and therefore have already been accounted for in the commitment data.
- 4.20. This windfall allowance is very conservative when it is considered what has been, and what continues to be, delivered in the Lincoln Urban Area, especially when the parts of the Lincoln Urban Area outside of the City of Lincoln administrative area are also considered.

### Small Sites in Smaller Settlements and the Rural Area

- 4.21. Under Policies LP2 and LP4 of the adopted Local Plan some development on small sites is supported in principle on suitable sites up to an assigned growth level for each 'Medium Village' and 'Small Village' in the settlement hierarchy. This is a valuable element of the supply and is therefore appropriate to include in the five year supply as windfall. It should be noted that these growth levels are not a target for small and medium villages, but instead guide what level of growth would be acceptable in total in a settlement across the plan period, should all other policy requirements be satisfied and the site be deemed appropriate for the proposed development.
- 4.22. Looking back at recent delivery in these medium and small villages it is clear that delivery has been fairly consistent.

*Table 10: Growth from Medium and Small Villages*

Year	2015/16	2016/17	2017/18	2018/19	2019/20	2020/21	2021/22	2022/23
Dwellings delivered	142	136	107	120	214	241		
Dwellings anticipated from permissions							286	349

- 4.23. In order to include a windfall allowance from this source, the remaining growth level at the end of the current monitoring year (2020/21) for all Medium Villages and Small Villages has been established and this has been distributed evenly across the remaining years of the plan period. This remaining growth windfall allowance also excludes sites with permission to avoid risk of double counting.
- 4.24. No windfall allowance on these small sites are included in years 2021/22 and 2022/23 as it is assumed that they would already have planning permission and therefore have already been accounted for in the commitment data.
- 4.25. The total remaining growth in Small Villages and Medium Villages at 1 April 2021 was 1,053 dwellings<sup>11</sup>. When aggregated across the remaining 13 years of the plan period (when 2021/22 and 2022/23 are excluded) this gives an allowance of 81 dwellings per year. Whilst this approach takes the entire remaining growth level across all villages and spreads it across the plan period, the delivery of the plan is not reliant on the growth levels being achieved in all settlements. It should be noted that the 81 dwellings included in the supply from 2023/24 is substantially lower than the lowest amount of growth recorded in these villages in any year since 2015/16.

#### Potential sources of windfall not currently included in the supply

- 4.26. No other windfall allowances have been included for growth from small sites (fewer than 25 dwellings) in any other towns or villages (levels 2-4 of the settlement hierarchy) or in hamlets (level 7 of the hierarchy) despite the fact that the Local Plan policies provide in-principle support for some development in suitable locations in many of these settlements.
- 4.27. Development on sites of fewer than 25 dwellings have delivered a significant amount of growth in these locations and they are anticipated to continue as is shown in Table 11.

*Table 11: Completions from small sites in Lincoln Urban Area (excluding in City of Lincoln), Main Towns, Market Towns, Large Villages, Hamlets and the Countryside.*

Year	2015/16	2016/17	2017/18	2018/19	2019/20	2020/21	2021/22	2022/23
Dwellings delivered	193	167	191	138	171	114		
Dwellings anticipated from permissions							159	122

- 4.28. This shows that there are additional sources of potential supply which will continue to deliver growth. The overall windfall allowance (at 156 dwellings per year from the small sites in the City of Lincoln area and remaining provision in Medium and Small Villages) across three council areas is therefore considered to be extremely conservative, and will be exceeded in reality. Based on the past completions since 2015/16, sites with fewer than 25 dwellings in these locations not being factored into windfall assumptions provided an average of 162 dwellings per year and this trend will undoubtedly continue given the flexibility provided by the Local Plan and taking into account the housing market in Central Lincolnshire.

<sup>11</sup> Based on the published LP4 monitoring of North Kesteven and West Lindsey at the end of the monitoring year.

- 4.29. Taking the evidence into account, it is clear that the windfall allowance is extremely conservative and is justified to continue to be included in the housing supply. Furthermore, given the scale of the discount included, an increased figure could be justified for inclusion. However, it is not proposed to be increased for the purposes of this report at this time.

## 5. CALCULATING THE FIVE YEAR SUPPLY

- 5.1. The following table provides a summary of the five year supply of deliverable housing sites based on site status at 31 March 2021. Full details are set out in Appendix C.

*Table 12: Estimated supply for 'current year' and in five year period*

Type of permission	2021/22 Current year	2022/23 Yr 1	2023/24 Yr 2	2024/25 Yr 3	2025/26 Yr 4	2026/27 Yr 5	Estimated total in five years

<b>Total</b>	<b>2,085</b>	<b>1,932</b>	<b>2,327</b>	<b>2,183</b>	<b>1,762</b>	<b>1,480</b>	<b>9,683</b>

Note 1: Small sites in table 12 relate to sites of up to 10 dwellings with large sites being 'major' development

- 5.2. The five year land supply results are set out in the Table 13.

*Table 13: Five Year Supply*

q	Estimate of five year land supply	<b>9,683</b>	See Table 12
r	Total years' worth of supply in the five year period	<b>5.35 years</b>	$q \div p$

The results show that the Central Lincolnshire Authorities have sufficient land to more than meet the five year requirement of 9,050 dwellings and can demonstrate 5.35 years of deliverable supply.

- 5.3. The Central Lincolnshire Districts will continue to work with developers to ensure a consistent and sustainable supply of housing land. Through the review of the Central Lincolnshire Local Plan, additional sites may be allocated and added to the supply where evidence justifies their inclusion in subsequent reports.

## APPENDIX A – Ratios for Student and Other Communal Accommodation

### Student Accommodation

2011 Census Data (CT0773) – Number of students in student only household

Dataset population: All student only households where all students are aged 18 or over \*

Table 14: Number of students in student only households

District	All student only households	Size of student only household														
		1	2	3	4	5	6	7	8	9	10	11	12	13	14	15+

NKDC	126	51	33	20	15	5	0	0	0	0	0	1	1	0	0	0
WLDC	101	42	27	22	9	1	0	0	0	0	0	0	0	0	0	0
Central Lincs	1,406	418	269	266	267	94	71	7	6	1	1	2	2	0	1	1

Table 14 identifies how many of each size student only households there were in Central Lincolnshire in the 2011 Census. However, in order to obtain the ratio, it is necessary to extrapolate this information to understand the total number of students in Central Lincolnshire, living in each size of student only accommodation. This is provided in Table 15, below.

Table 15: Total number of students by size of student only household

District	All student only households	Number of students living in communal accommodation of by number of students in the accommodation																Ratio
		1	2	3	4	5	6	7	8	9	10	11	12	13	14	15+	Total

NKDC	126	51	66	60	60	25	0	0	0	0	0	11	12	0	0	0	285	<b>2.26</b>
WLDC	101	42	54	66	36	5	0	0	0	0	0	0	0	0	0	0	203	<b>2.01</b>
Central Lincs	1,406	418	538	798	1,068	470	426	49	48	9	10	22	24	0	14	15	3,909	<b>2.78</b>

Table 15 demonstrates the ratio for each of the Central Lincolnshire authorities and also what the ratio would be for Central Lincolnshire as a whole. Given the differences between each of the districts (in terms of their built nature and the types of student accommodation likely to be delivered) it is proposed that, rather than taking the Central Lincolnshire average of 2.78, that the ratio for each District be applied where student accommodation is proposed.

## Older Persons Accommodation

2011 Census Data (CT0774) - Age of Household Reference Person (HRP) by number of adults in household

Dataset population: All Household Reference Persons (HRPs) aged 16 or over

Table 16: Total number of households by size of household

District	Total	Size of households														
		1	2	3	4	5	6	7	8	9	10	11	12	13	14	15+
Lincoln	39,823	16,345	18,534	3,405	1,127	259	123	11	9	4	1	2	1	0	1	1
North Kesteven	45,971	14,252	26,781	3,821	945	144	19	2	2	1	1	2	1	0	0	0
West Lindsey	38,384	12,479	21,524	3,403	823	128	19	7	1	0	0	0	0	0	0	0

Table 16 shows how many of each size household there were in the 2011 Census. As for with the students, it also needs to be extrapolated into the number of people living in each size household in order to arrive at a ratio. This is provided in Table 17 below.

Table 17: Total number of adults by household size

District	Total number of adults (aged 16 or over) by size of household																Ratio
	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	Total adults	
Lincoln	16,345	37,068	10,215	4,508	1,295	738	77	72	36	10	22	12	0	14	15	70,427	1.769
North Kesteven	14,252	53,562	11,463	3,780	720	114	14	16	9	10	22	12	0	0	0	83,974	1.827
West Lindsey	12,479	43,048	10,209	3,292	640	114	49	8	0	0	0	0	0	0	0	69,839	1.819

The average for England and Wales is also 1.8 when rounded. Therefore, as this rounded figure is being used in the HDT Rule Book and the Central Lincolnshire figures all round to this, it is proposed that a ratio of 1.8 should be applied to calculations relating to any residential institutions in Central Lincolnshire in order to calculate the amount of general market dwellings released.

Ongoing discussions with site owner and with new application expected soon, but lacking evidence at this time to demonstrate that it will come forward in the five year period.
2020/0419/OUT & 2017/0053/OUT		Church, Long Leys Road, Lincoln	OUT	CofL	Lincoln	10	0	10	0	0	10	0	0	0	5	5	0	0	10	Replacement outline application (2020/0419/OUT) approved in October 2020 expected to proceed with detailed permission with delivery within 5 year period.
	CL526	Former Main Hospital Complex, St Anne's Road, Lincoln		CofL	Lincoln	50	0	50	0	0	50	0	0	0	0	0	0	0	0	Site owners have confirmed through discussions with City of Lincoln Council plans to secure permission on smaller area of the site for a reduced number from the allocation (126 dwellings). Planning application expected soon and unconstrained, very marketable, and central location. However, whilst it is expected to deliver within the five year period, there is no clear evidence to demonstrate it at this time so a cautious position has been taken with the supply position.
	CL4430	North West of Lincoln Road Romangate, Lincoln		CofL	Lincoln	60	0	60	0	0	60	0	0	0	0	0	0	0	0	Site controlled by the developer of the neighbouring site which is being developed and site is available now and developer has confirmed intention to develop this site when the neighbouring site is complete. Not expected to deliver within the five year period at this time.
