A.4 Develop the sustainability appraisal framework	11
A.5 Consult the consultation bodies on the scope of the sustainability appraisal.....	12
Stage B Developing and refining alternatives and assessing effects	12
B.1 Test the plan objectives against the sustainability appraisal framework.....	12
B.2 Develop the Local Plan options including reasonable alternatives	13
Reasons for Selecting the Preferred Policy and Site Options.....	13
Appraisal Methodology	13
Site Allocations SA Framework.....	14
Difficulties Encountered	15
Sustainability Appraisal Findings	15
B.3 Evaluate the likely effects of the Local Plan and alternatives	15
Vision.....	15
Local plan policies and site allocations.....	15
Types of Local Plan effects	37
Secondary effects	37
Synergistic effects.....	37
Short term and long impacts	37
Permanent and temporary impacts	38
B.4 Consider ways of mitigating adverse effects and maximising beneficial effects	38
B.5 Propose measures to monitor the significant effect of implementing the Local Plan	38
Stage C Prepare the SA report.....	42
Stage D Seek representations on the sustainability appraisal report	42
Conclusion	43

Introduction

1. The Central Lincolnshire authorities (City of Lincoln Council, North Kesteven Council and West Lindsey District Council) have prepared a new Local Plan for Central Lincolnshire. The adopted Local Plan sets out planning policies and allocations for the growth and regeneration of Central Lincolnshire over the next 20 years.
2. This is the Non-Technical Summary of the Sustainability Appraisal Report (SA) for the adopted Central Lincolnshire Local Plan, April 2023. It provides an overview of the SA process and findings in accordance with the requirements of the Strategic Environmental Assessment (SEA) Regulations, the Planning and Compulsory Purchase Act 2004 and national planning policy and guidance.

Central Lincolnshire Local Plan

About Central Lincolnshire

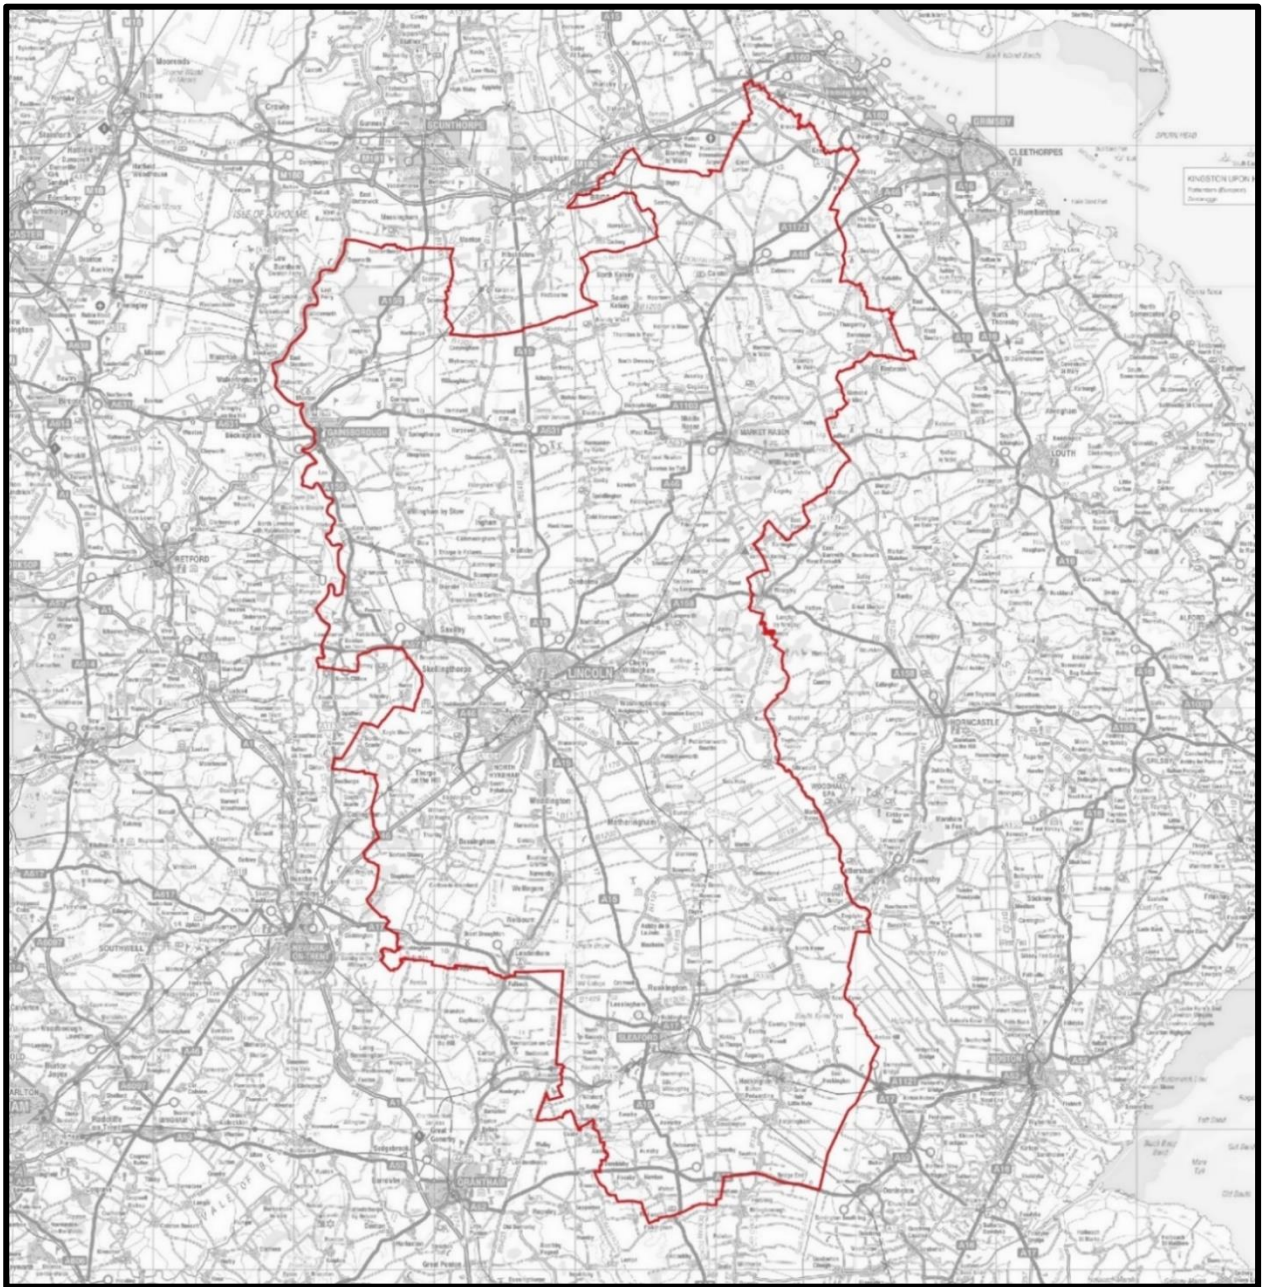

3. Central Lincolnshire is situated within the East Midlands and covers the administrative areas of the City of Lincoln, North Kesteven and West Lindsey District Councils¹. The total land area is approximately 2,116 km². To the north are the districts of North Lincolnshire and North East Lincolnshire, to the east is the district of East Lindsey, to the south are the districts of Boston and South Kesteven, and to the west are the districts of Newark and Sherwood and Bassetlaw.
4. The largest urban settlement is Lincoln, which acts as a sub-regional centre over a wide area. There are a number of villages that look to Lincoln for most of their needs, including Welton, Saxilby, Skellingthorpe and Washingborough. Beyond Lincoln, the main settlements are Gainsborough and Sleaford, serving the northern and southern parts of the area respectively. The rest of Central Lincolnshire is predominantly rural, characterised by a dispersed settlement pattern of villages plus the small market towns of Market Rasen and Caistor in West Lindsey. There are no motorways in Central Lincolnshire. The key roads include the A15, A17, A46, A158 and A159.

Central Lincolnshire Local Plan review

5. The new Local Plan will cover the period 2018 to 2040 for the entire Central Lincolnshire area, as shown in **Map 1** below. It will replace the adopted Local Plan, April 2017. The Local Plan includes a vision for what Central Lincolnshire could be like in 2040, 15 objectives and strategic priorities for the area. The Plan is accompanied by a Policies Map, which includes new sites for housing and employment.
6. The Local Plan has undergone several stages of development. **Table 1** below provides a summary of the main stages involved in the development of the Local Plan.

¹ The Central Lincolnshire Authorities plus Lincolnshire County Council

Map 1: Map of Central Lincolnshire

Source: Central Lincolnshire Local Plan Team

Table 1: Central Lincolnshire Local Plan - Timetable of Production

Stage		Description and Target Date
1	Public Participation	Completed - July 2019 Opportunities for the public and stakeholders to consider and comment on the different options for the plan before the final document is produced.
2	Further Public Participation (Regulation 18)	Completed - June to August 2021 As above, but a draft version of the plan was made available for a 6 week period of public consultation which included draft policies, sites for development and a Policies Map.
3	Pre-Submission Publication (Regulation 19)	Completed – March to May 2022 The Joint Committee published the Local Plan for a 6 week period of public consultation where formal representations could be made on the Local Plan.
4	Submission (Regulation 22)	Completed – July 2022 The Joint Committee submitted the Local Plan to the Secretary of State.
5	Independent Examination – Hearings	Completed Public hearings were held by two Planning Inspectors appointed by the Secretary of State into objections raised on the Local Plan.
6	Independent Examination – Recommended Modifications	Completed – January to February 2023 Public consultation on the changes likely to be required to address concerns identified by the Inspectors or representors during the hearings.
7	Inspectors' Report Issued	Completed – 29 March 2023 The Inspectors' report sets out whether the Local Plans is 'sound' or 'not sound'. The Inspectors make recommendations to make the plan 'sound'.
8	Adoption of Local Plan	Completed – 13 April 2023 Final stage. The Joint Committee formally adopts the Local Plan and it will then be used in making planning decisions.

Sustainability Appraisal

7. SA is an on-going process undertaken alongside the preparation and development of the Local Plan. Its purpose is to assess the social, economic and environmental impacts of the Local Plan, when judged against reasonable alternatives, so that the chosen plan promotes sustainable development. It also aims to minimise negative impacts and to consider how the Local Plan can contribute to improvements in social, economic and environmental conditions.
8. SA is a legal requirement introduced by the Planning and Compulsory Purchase Act (2004). The Local Plan has therefore been subject to SA under the requirements of this Act and paragraph 32 of the National Planning Policy Framework (NPPF). Local Plans must also be subject to SEA. Government guidance advises that the SA may integrate the requirements of SEA. SEA and SA are similar processes that involve a comparable series of tasks. The main difference is that SEA focuses on environmental effects, whereas SA covers environmental, social and economic issues.
9. National SA guidance specifies five main stages of work (Stages A to E) that have to be undertaken during the SA of any Local Plan.

Stage A Deciding on the scope of the Sustainability Appraisal

10. The first stage of the SA process is known as the 'Scoping Stage' and is undertaken to identify the extent and detail of the information to be included in the SA Report. The Scoping Stage involved a review of relevant policies, plans and programmes, to identify their relationship to the Local Plan, identifying key issues for the Local Plan to address, collecting information on the current state of the environment and identifying future trends without the Local Plan. This work helped to inform the development of the SA Framework; a set of sustainability objectives and key questions that are used to consistently predict and describe the impacts of the Local Plan.
11. The Central Lincolnshire Authorities prepared a Draft SA Scoping Report and consulted the consultation bodies² in June/July 2019. All comments received were duly considered and the SA Scoping Report amended, as considered necessary, to produce the Final SA Scoping Report (July 2020).
12. As well as changes to address consultation comments received on the draft SA Scoping Report, some parts of the Scoping Report have been updated and amended following the Further Draft Local Plan consultation, to reflect actions taken to responses in that consultation and adjustments to the methodology, including the SA Framework. The Final SA Scoping Report (March 2022) was re-published alongside the Proposed Submission Local Plan.

A.1 Relevant policies, plans and programmes

13. The most important national plan, policy or programme in relation to the Local Plan is the National Planning Policy Framework (NPPF), as the Local Plan must not be in conflict with national planning policy. The NPPF requires Local Plans to be informed by SA throughout their preparation.

² The consultation bodies are defined in the SEA Regulations. In England these are: Historic England, Natural England and the Environment Agency.

14. The NPPF is supported by National Planning Policy Guidance (NPPG), which provides more detailed guidance on national planning policy. The NPPG provides guidance on the need for and requirements of SA.
15. There are a large number of plans and programmes that are relevant to the preparation of the Local Plan. These can be viewed in the SA Scoping Report (March 2022).

A.2 Baseline information

16. The SEA requires the consideration of baseline information. The NPPG advises that the term 'baseline information' refers to "the existing environmental, economic and social characteristics of the area likely to be affected by the plan, and their likely evolution without implementation of new policies." Schedule 2 of the SEA Regulations requires data to be gathered on: biodiversity, population, human health, flora, fauna, soil, water, air, climatic factors, material assets, cultural heritage including architectural and archaeological heritage and landscape.
17. Baseline information gathered as part of the SA process can be viewed in the SA Scoping Report (March 2022) and **Appendix 1** of the Main SA Report, April 2023.

A.3 Key Sustainability issues and problems

18. The baseline information fed into the identification of key sustainability issues for Central Lincolnshire. **Table 2** below provides a summary of these key issues. Without the Local Plan, existing trends are likely to continue. There is a risk of a lack of co-ordination between where development takes place and where it is needed, and the infrastructure required to support sustainable development. There is also a risk that the environment would be subjected to permanent, potentially irreversible negative effects without local planning policy to guide development to areas with the least sensitive environments.

Table 2: Key Sustainability Issues for Central Lincolnshire

Housing
<ul style="list-style-type: none"> The number of households in Central Lincolnshire is predicted to increase over the next 25 years, but at a rate below the regional and national trends. Average house prices are rising across Central Lincolnshire and are on par with national % increases. The number of households in fuel poverty is above the county average in Lincoln and West Lindsey. Lincoln's population of students has grown considerably in recent years. Shared accommodation often a preferred choice for many but can cause difficulties where there is a high concentration in a particular area.
Health and Well-Being
<ul style="list-style-type: none"> Life expectancy in Lincoln remains lower than the county and national average for both men and women. Obesity rates in Year 6 children in Lincoln are worse than the national average. Excess weight in adults is worse than the national average in West Lindsey and North Kesteven. Early deaths from cardiovascular disease are above the national average in Lincoln. Early deaths from cancer are above the national average in Lincoln. Excess winter deaths are above the national average in Lincoln and West Lindsey.

<ul style="list-style-type: none"> • Health inequalities exist on a ward level, particularly within Lincoln and Gainsborough. For example, some wards are significantly worse than the national trend for a number of indicators, including life expectancy, income deprivation and child poverty. • There is a need to promote healthy lifestyles. • The need to safeguard existing health care facilities and services and ensure the timely delivery of new facilities and services to meet needs arising from new development.
Social Equality and Community
<ul style="list-style-type: none"> • There is an ageing population within Central Lincolnshire. • Growth in the population aged 16-24 in Lincoln is expected to be significantly higher than the county average, reflecting the presence of Lincoln University, Bishop Grosseteste University and Lincoln College in the city. • There is a need to reduce the overall crime rate, particularly in Lincoln and incidents of anti-social behaviour. • Rates of dependent children under 20 living in poverty are above the regional and national average for West Lindsey and Lincoln. • Parts of the area are experiencing significant deprivation, with some parts of Lincoln and Gainsborough in the top 10% most deprived Super Output Areas in England for all domains of deprivation.
Biodiversity and Green Infrastructure
<ul style="list-style-type: none"> • Although there are no international designated sites within the boundary of Central Lincolnshire, there are a number of nationally important sites, such as Bardney Limewoods National Nature Reserve and numerous SSSIs. There is a need to protect and enhance these sites, particularly sites that are in an unfavourable (declining and no change) condition, to prevent further deterioration and to improve their condition. • The area of LNR is below the recommended standard of 1 hectare per 1000 population in Lincoln and West Lindsey. • Habitat loss and fragmentation is one of the main reasons for biodiversity decline. Facilitating the movement of species across the area and creating an ecological and green infrastructure network of natural greenspaces would help improve biodiversity and help species to adapt to climate change. • A deficiency in certain types of open space has been identified in a number of areas across Central Lincolnshire. An increase in population will lead to an increase in demand for publicly accessible open space, sports and leisure facilities for sport and recreation, placing pressure on existing spaces, biodiversity and geodiversity.
Landscape and Townscape
<ul style="list-style-type: none"> • The Lincolnshire Wolds AONB is one of only two nationally protected landscapes in the East Midlands region. The special qualities of the AONB are under pressure from numerous sources, including development. • Lincoln has a special character which arises from its unique setting, with important views in and out of the city, principally to and from the Lincoln Ridge, which supports spectacular views of the cathedral, castle and uphill Lincoln. • There is a need to conserve and enhance landscape and townscape character and to promote development which respects character and local distinctiveness.
Built and Historic Environment
<ul style="list-style-type: none"> • Central Lincolnshire has nationally significant heritage assets, including Lincoln Cathedral, Lincoln Castle and roman monuments.

<ul style="list-style-type: none"> • There are a total of 62 heritage assets (as of 2021) in the Central Lincolnshire area on Historic England's Heritage at Risk Register. • The continued growth in population and the increasing demand for new housing, will place pressure on the area's heritage assets and could result in negative effects if not planned sympathetically. It will be important that development avoids harm to designated heritage assets and their settings. • There is a need to recognise the value of non-designated heritage assets and their settings.
Natural Resources – Water
<ul style="list-style-type: none"> • Central Lincolnshire lies within an area of serious water stress where drought is a cause for concern. This could be exacerbated with increased demand for water from a growing population. • The supply-demand balance for water in the Anglian region is under significant pressure from population growth, climate change, sustainability reductions and the need to increase resilience to severe drought. • There is therefore a need to promote the efficient use of water resources. • There is a need to ensure the timely provision of water services infrastructure to meet demand arising from new development. • There are a number of water bodies within Central Lincolnshire that are currently failing to meet the Water Framework Directive objective of 'Good' status. Run-off from increased development could worsen the baseline situation.
Pollution
<ul style="list-style-type: none"> • There is a heavy reliance on the private car as the main mode of transport within the area. • Local air quality has improved in recent years, with the removal of 1 AQMA within Lincoln and a reduction in the extent of the remaining AQMA. However, vehicle traffic remains an issue in Lincoln as the remaining AQMA was designated for nitrogen dioxide that exceed national air quality objectives. • The rate of noise complaints in Central Lincolnshire is slightly above the regional average, but below the national average.
Natural Resources – Land Use and Soil
<ul style="list-style-type: none"> • The large areas of Grade 2 agricultural land is a significant asset to the area, however the need to ensure a housing supply through the Local Plan will result in some development within these areas. There is a need to encourage development on brownfield land. • There is a legacy of contaminated land, particularly in Lincoln. The cost to remediate sites could increase pressure on greenfield sites.
Waste
<ul style="list-style-type: none"> • Rates of household waste reused, recycled or composted have got worse within recent years, which need to improve, however the quantity of household waste collected per person has reduced. • There is a need to ensure that waste management accords with the waste hierarchy. • Reducing the amount of construction and demolition waste arising from new development.
Climate Change Effects and Energy

<ul style="list-style-type: none"> Carbon dioxide emissions overall are decreasing, however emissions from transport sources are increasing. Emissions cuts must average -13.4% per year to deliver a Paris aligned carbon budget. New development required as a result of an increasing population will increase demands for energy generation in the future. There is a need to reduce energy consumption and reliance on finite resources, exploring alternative ways to increase the amount of energy generated by decentralised or renewable sources. The attractiveness of renewable technologies is expected to increase as costs fall. There is a need to protect and enhance natural 'carbon sinks', including peat soils.
Climate Change Adaptation and Flood Risk
<ul style="list-style-type: none"> Climate change over the coming years is likely to increase the likelihood and consequences of flooding. Central Lincolnshire contains significant areas of low-lying land and many of Central Lincolnshire's settlements were originally established adjacent to rivers or other water bodies. Development coming forward in areas at risk of flooding will need to mitigate the impacts of climate change, to be safe itself and not increase flood risk to others. There is a need to encourage the use of SuDS and integrated water management.
Transport and Accessibility
<ul style="list-style-type: none"> There is a heavy reliance on the private car, particularly in rural parts of Central Lincolnshire. Greater car ownership will continue to increase road congestion, parking problems, car dependency and environmental problems such as air pollution, noise pollution and carbon dioxide emissions. There is therefore a need to encourage alternatives modes of transport to the private car. The percentage of households without access to a car is above the county, regional and national average in Lincoln and Gainsborough. There is therefore a need to ensure that new development is accessible to employment, facilities and services so as to reduce the need to travel. Some villages have limited public transport services, so there is a need to improve public transport links between the city and main towns, and the villages, especially during evenings and at weekends.
Employment
<ul style="list-style-type: none"> Many of Central Lincolnshire's schools, but particularly in Lincoln, Sleaford and Gainsborough, are at capacity or oversubscribed. This trend is likely to continue as the population continues to grow. Gross weekly earnings for full time workers are below the national average and below the regional average in Lincoln. Parts of Gainsborough and Lincoln are in the top 10% most deprived in the country for education, skills and training, highlighting disparities in attainment skills and training in some wards.
Local Economy
<ul style="list-style-type: none"> As a predominantly rural area, the needs of rural businesses need to be considered, including allowing appropriate growth of businesses that require a rural location and diversification of the agricultural economy. The retail role of the hierarchy of centres needs to be supported to help reduce vacancy rates and avoid the loss of shop units to other uses. The tourist economy needs to be supported and encouraged, whilst respecting the natural and historic environment.

A.4 Develop the sustainability appraisal framework

19. The identification of key sustainability issues during the Scoping Stage fed into the development of a set of 15 sustainability objectives. The objectives within the Central Lincolnshire Local Plan are the same as the SA objectives. The objectives are presented in **Table 3** below.

Table 3: Sustainability Appraisal Objectives

<p>1. Housing. To ensure that the housing stock meets the housing needs of the Central Lincolnshire area.</p>
<p>2. Health and Wellbeing. To reduce health inequalities, promote healthy lifestyles and maximise health and wellbeing.</p>
<p>3. Social Equality and Community. To stimulate regeneration that maximises benefits for the most deprived areas and communities in Central Lincolnshire. To also ensure equitable outcomes for all, particularly those most at risk of experiencing discrimination, poverty and social exclusion.</p>
<p>4. Biodiversity and Green Infrastructure. To conserve and enhance biodiversity and geodiversity across Central Lincolnshire and provide opportunities for people to access and appreciate wildlife and the natural environment. To create and improve high quality green and blue spaces that are multifunctional, (including opportunities for sport, recreation and play), accessible to all and which form part of and are connected to the green infrastructure network.</p>
<p>5. Landscape and Townscape. To protect and enhance the rich diversity of the character and appearance of Central Lincolnshire's landscape and townscape, maintaining and strengthening local distinctiveness and sense of place.</p>
<p>6. Built and Historic Environment. To protect and enhance the significance of the buildings, sites and features of archaeological, historic or architectural and artistic interest and their settings, and ensure new buildings, spaces and places are designed to a high quality.</p>
<p>7. Natural Resources – Water. To protect and enhance water resources and their quality in Central Lincolnshire.</p>
<p>8. Pollution To minimise pollution (air, noise and light) and improve air quality.</p>
<p>9. Natural Resources – Land Use and Soils. To protect and enhance soil and land resources and quality in Central Lincolnshire.</p>
<p>10. Waste. To minimise the amount of waste generated across all sectors and increase the re-use, recycling and recovery rates of waste materials.</p>
<p>11. Climate Change Effects and Energy.</p>

To minimise the effects of climate change by developing the area's renewable energy resources, reducing dependency on fossil fuels, minimise energy usage, and to reduce greenhouse gas emissions from the area contributing to the achievement of a carbon net-zero Central Lincolnshire.
12. Climate Change Adaptation and Flood Risk. To ensure Central Lincolnshire adapts to the effects of climate change, both now and in the future through careful planning and design of development, including reducing and managing the risk of flooding from all sources.
13. Transport and Accessibility. To make efficient use of the existing transport infrastructure, reduce the need to travel by car, improve accessibility to jobs and services for all and to ensure that all journeys are undertaken by the most sustainable travel modes (particularly public transport, walking and cycling).
14. Employment. To create and improve access to high quality employment, training and learning opportunities for everyone within the Central Lincolnshire area.
15. Local Economy. To encourage and support a competitive, diverse and stable economy and to protect and enhance Central Lincolnshire's hierarchy of centres to meet the needs of residents and visitors.

20. The Local Plan policies and site allocations have been assessed using a Sustainability Appraisal Framework ('SA Framework'). This is a commonly used tool to assess the policies and site allocations in the Local Plan in terms of their contribution towards sustainable development. The SA Framework consists of the SA objectives and a set of decision-making questions, tailored to the key sustainability issues and problems for the Central Lincolnshire area. There is a SA Framework for policies and one for site allocations. The full SA Frameworks can be viewed in **Section 4** and **Appendix 2** of the Main SA Report, April 2023.

A.5 Consult the consultation bodies on the scope of the sustainability appraisal

21. When deciding on the scope and level of detail of the information to be included in the report, the plan-maker must consult the statutory consultation bodies. The consultation bodies are defined in the SEA Regulations, and in England, these are: Historic England, Natural England, and the Environment Agency. The Central Lincolnshire Authorities prepared a Draft SA Scoping Report and consulted the consultation bodies in June/July 2019. All comments received were duly considered and the SA Scoping Report amended slightly, as considered necessary, to produce the Final SA Scoping Report.
22. A summary of the consultation responses and actions taken to address them, for all stages of the SA to date, can be viewed in **Appendix 8** to the SA Main Report, April 2023.

Stage B Developing and refining alternatives and assessing effects

B.1 Test the plan objectives against the sustainability appraisal framework

23. The sustainability objectives developed through the Central Lincolnshire SA Scoping Report are the same objectives as those in the Central Lincolnshire Local Plan. By preparing the Plan

and SA with a single set of objectives, this should ensure that there is no conflict between the objectives of the Plan and the sustainability principles formulated through the SA process.

B.2 Develop the Local Plan options including reasonable alternatives

24. Identifying the different options for preparing the Local Plan is a key requirement of the SEA Regulations and national planning policy and an important component of the SA process.
25. The development of the Local Plan involves several stages, with extensive consultations with both statutory and non-statutory organisations, developers, and members of the public. The comments received on the Local Plan and the SA can help to identify where there are 'reasonable' alternatives to the options for policies and site allocations being considered in the Local Plan. National guidance requires only "reasonable alternatives" to be taken into account, and so not every possible alternative has to be considered.
26. The reasonable alternatives considered for the Central Lincolnshire Local Plan include the overall strategy for the spatial distribution of new housing and jobs in the area, the total number of new homes and their distribution, different policy approaches and potential sites for new housing. They have been derived from a number of sources, including background evidence studies, previous SA work and public consultation on previous stages of the Local Plan. In some cases, no other reasonable alternative has been identified other than rely on national planning policy and guidance.

Reasons for Selecting the Preferred Policy and Site Options

27. The Central Lincolnshire Authorities have taken into account the SA when selecting the preferred policy and site options for the Local Plan. However, it is important to recognise that the SA is not the only influence in the process of selecting and rejecting options. The Local Plan must conform to national planning policy, take into account comments from public consultations and the include sites that are available and deliverable.
28. The reasons for selecting the preferred site allocations in light of the reasonable alternatives are set out in more detail in the following reports:
 - Central Lincolnshire Local Plan Review Growth Options Paper (June 2021)
 - Central Lincolnshire Site Allocations Settlement Analysis (June 2021)
 - Each Local Plan policy is accompanied by a Policy Evidence Report (March 2022)
 - Policies S75 – S81: Sustainable Urban Extensions and Housing Allocations in Lincoln Urban Area, Main Towns, Market Towns, Large Villages, Medium Villages and Small Villages Evidence Report and Appendices (March 2022)
 - The Main SA Report and Appendices(April 2023) appraise all of the reasonable alternatives for Local Plan policies and sites alongside and in the same way as the preferred policies and site allocations. The detailed SA matrices can be found in **Appendix 4** of the Main SA Report for policies, and **Appendix 5** and **Appendix 6** for sites. **Appendix 7** of the Main Report presents a summary of the reasons for selecting and rejecting reasonable alternatives to policies and sites within the Local Plan.

Appraisal Methodology

29. The anticipated effect of each policy has been assessed in relation to each SA objective, using a standard SA scoring system (see **Table 4** below). This ranges from a significant positive effect to a significant negative effect. The SA Framework has been used to identify and assess these effects. The aim of the SA scoring system is to provide transparency in the appraisal process, enabling a clear and consistent approach to the appraisal. It does not however rank the alternatives in anyway. Commentary is provided in relation to each SA objective, and mitigation measures to enhance the performance of the policies, or address any potential negative effects, is provided in the conclusion and recommendations section. Further information is provided in **Section 4** of the Main Report, April 2023.

Table 4: Scoring Criteria

Symbol		Definition of Effect
++	Major positive effects	The option or policy is likely to lead to a significant improvement , and to large scale and permanent benefits on the sustainability objective being appraised.
+	Minor positive effects	The option or policy is likely to lead to moderate improvement and to large scale temporary or medium scale permanent benefits to the sustainability objective being appraised. Beneficial effects should not be easily reversible in the long-term.
0	Neutral effects	A neutral scoring indicates that there are negligible or no effects upon the sustainability objective being appraised. This may include the continuation of a current trend.
-	Minor negative effects	The option or policy is likely to lead to moderate damage or loss , leading to large scale temporary or medium scale permanent negative effects on the sustainability objective being appraised.
--	Major negative effects	The option or policy is likely to lead to significant or severe damage or loss in relation to the sustainability objective being appraised.
/	Mixed effects (e.g. ++/ - major positive and minor negative effects)	The effect is likely to be a combination or mixture of positive and negative effects.
?	Uncertain	The effect is not known or is too unpredictable to assign a conclusive score. This may be due to lack of data, or that effects will not be known until more detailed information is provided (for example when a planning application is submitted).

Site Allocations SA Framework

30. The potential site allocations and all reasonable alternatives have been appraised against the SA objectives using tailored appraisal criteria suitable for determining effects and their magnitude at a site level. The SA Framework and assumptions applied in the appraisal of sites can be viewed in **Appendix 2** of the SA Main Report, April 2023. This was subject to

consultation with the statutory consultation bodies via the SA Scoping Report and has been refined following the consultation to reflect their comments and adjusted following a pilot appraisal of small selection of sites.

Difficulties Encountered

31. The SEA Regulations require the SA Report to include a description of any difficulties encountered during the SA process and compiling the SA Report. One of the main difficulties in appraising the reasonable alternatives for the Local Plan policies was uncertainty surrounding their implementation and outcomes in practice, due to their high-level nature, which made it difficult to assess the likely effects. Therefore, it has been necessary to base predicted effects on a range of assumptions. These are documented in the appraisal matrices and the SA Framework for sites.
32. In terms of data limitations, there were some limitations relating to the data available in GIS that was used to appraise the site options:
- The available data for bus stops was dated January 2016. Distances from sites to bus stops was therefore estimated using more recent satellite imagery.
 - For sites on the edge of the boundary of Central Lincolnshire, spatial data had to be sought from sources beyond the Central Lincolnshire GIS system. For example, in relation to Objective 4 Biodiversity and Green Infrastructure, DEFRA's Magic Map was used to identify statutory designated sites, such as SSSIs, however it does not provide data for Local Wildlife Sites.

Sustainability Appraisal Findings

B.3 Evaluate the likely effects of the Local Plan and alternatives

Vision

33. Overall, the vision is expected to have positive effects on the SA objectives, as it seeks to meet the key sustainability challenges facing the plan area which touch on the majority of the SA objective topics.

Local plan policies and site allocations

34. **Section 5** of the Main SA Report, April 2023 presents the findings of the SA of the Local Plan policies and site allocations. The detailed, full SA of the policies are set out in **Appendix 4** to the Main Report and for the site allocations, in **Appendix 5** and **Appendix 6**.
35. The likely effects of implementing the preferred policies within the Local Plan are summarised in **Table 5** and the effects of the preferred site allocations are summarised within **Table 6**.

Table 5: Summary of effects for the preferred policies in the Local Plan**Key:**

Table 6: Summary of Effects of the Housing Site Allocations

Sites that are greyed out have not been subject to SA because they are sites with planning permission, and which are under construction on site.

Sites highlighted green are those sites which have been allocated in the adopted Central Lincolnshire Local Plan, April 2023. Sites highlighted amber are the reasonable alternatives to the preferred sites.

Policy and Site Reference	Sustainability Objective

Types of Local Plan effects

36. Schedule 2 of the SEA Regulations requires the determination of the likely significant effects on the environment, including short, medium and long-term effects, permanent and temporary effects, positive and negative effects, and secondary, cumulative and synergistic effects.

37. Each of the policies and site allocations in the Local Plan have been assessed for their individual impact against the SA objectives, but there may be combined effects which may occur as a result of implementing the Local Plan as a whole. These are known as cumulative effects and their consideration is a requirement of the SEA Regulations.

Table 7 below presents a summary of the likely cumulative effects of the implementation of the Proposed Submission Local Plan.

Table 7. Cumulative Effects of the Local Plan as a Whole

SA Objective	Likely Cumulative Effect
1. Housing	++
2. Health and Wellbeing	++
3. Social Equality and Community	++
4. Biodiversity and Green Infrastructure	+
5. Landscape and Townscape.	+/-
6. Built and Historic Environment	+/-
7. Natural Resources – Water	+/?
8. Pollution	+/-
9. Natural Resources – Land Use and Soils	+/-
10. Waste	+/-
11. Climate Change Effects and Energy	+/-
12. Climate Change Adaptation and Flood Risk	+
13. Transport and Accessibility	+
14. Employment	++
15. Local Economy	++

Secondary effects

38. Secondary effects are effects that are not a direct result of implementing the Local Plan but occur away from the original effect or because of a complex pathway. They are the indirect effects of the Local Plan. An example of a secondary effects identified in the SA are the health benefits of improved air quality, improved walking and cycling routes, remediated contaminated land, provision of affordable housing, and improved access to open spaces and the natural environment.

Synergistic effects

39. Synergistic effects interact to produce a total effect greater than the sum of the individual effects. An example of a synergistic effect identified in the SA is reduced social inequality as a result of: directing development to the main urban settlements, provision of affordable homes, delivery thermal efficient homes, regeneration and provision of employment opportunities.

Short term and long impacts

40. Short term impacts will occur in the first 5 years of the Local Plan following its adoption. They are likely to include negative impacts, such as increased levels of construction traffic, noise and dust. Long term impacts exist beyond the lifetime of the Plan. They are persistent and are likely to continue for several years, decades or could even be regarded as permanent. An example of a long-term impact identified in the SA is reduced energy demand from new development.

Permanent and temporary impacts

41. The main temporary impacts of the Local Plan are associated with construction, such as increased levels of construction traffic, noise and dust, and will cease when the development has been completed. An example of a permanent impact identified in the SA is loss of agricultural land and soils to development.

B.4 Consider ways of mitigating adverse effects and maximising beneficial effects

42. The SEA Regulations require a description of “the measures envisaged to prevent, reduce and as fully as possible offset any significant adverse effects on the environment of implementing the plan”. Typically, mitigation measures could include:

- Changes to policy wording
- Removal of statements that do not promote the SA objectives
- The addition of new statements
- Development of new options, for example a combination of the best aspects of existing options
- Requirements to offset certain types of impacts
- Requirements for further assessments, such as traffic assessments, archaeological evaluation etc.
- Mitigation measures for other plans, programmes or strategies.

43. Conclusions on the sustainability strengths and weaknesses of each option have been recorded in the detailed SA of each policy option and site option, together with any recommendations for improving the positive effects and reducing potential negative effects.³ **Section 5** of the Main SA Report, April 2023 discusses in more detail how the recommended mitigation measures in the SA have been taken into account in the preparation of the Proposed Submission Local Plan.

B.5 Propose measures to monitor the significant effect of implementing the Local Plan

44. The SEA Regulations require the monitoring of the likely significant effects of implementing the Local Plan with the aim of identifying unforeseen adverse impacts at an early stage and being able to undertake appropriate action to address such effects. Stage E is finalised on adoption of the Local Plan by the Central Lincolnshire Authorities.
45. Recommendations for monitoring at this stage are presented in **Section 6** of the Main SA Report, April 2023 and will be finalised in the SA Post Adoption Statement (Stage E of the SA process). **Table 8** below includes a set of suggested monitoring indicators which could be used to monitor the effectiveness and significant effects of the policies within the Local Plan.

³ See **Appendix 3, Appendix 4, Appendix 5 and Appendix 6** of the Main SA Report

Table 8: Potential Monitoring Indicators

SA Objective	Potential Monitoring Indicators
<p>1. Housing. To ensure that the housing stock meets the housing needs of the Central Lincolnshire area.</p>	<ul style="list-style-type: none"> • Annual net dwellings completions by category in settlement hierarchy and by settlement • Number of homes granted planning permission by number of bedrooms • Number of homes granted planning permission which meet the higher access standards of Part M Building Regulations (Access to and use of buildings) • Number of private sector empty homes brought back into use for residential occupation purposes • Number of Planning Permissions for subdivision and multi-occupation dwellings in Lincoln • Annual net gypsy and traveller pitches granted planning permission • Gross affordable dwellings completed • Affordable housing completed by product type • Gross self-build dwellings completed • Statutory homeless households • Number of households on the housing waiting list • Household and population projections and forecasts • Average house prices • Number of dwellings granted planning permission as part of a scheme for the development of a Ministry of Defence Establishment civilian community
<p>2. Health and Wellbeing. To reduce health inequalities, promote healthy lifestyles and maximise health and wellbeing.</p>	<ul style="list-style-type: none"> • Life expectancy • % Children obese (Year 6) • Excess weight in adults • % Physically active adults • New health care facilities, permitted, lost and completed • Contributions received for health facilities through s106 agreement and CIL payments
<p>3. Social Equality and Community. To stimulate regeneration that maximises benefits for the most deprived areas and communities in Central Lincolnshire. To also ensure equitable outcomes for all, particularly those most at risk of experiencing discrimination, poverty and social exclusion.</p>	<ul style="list-style-type: none"> • Index of Multiple Deprivation ranking by domain • Planning permissions for new community facilities by type • Number of crimes by type • Community profile: population, age, gender, race, religion and, marriage and civil partnership

SA Objective	Potential Monitoring Indicators
	<ul style="list-style-type: none"> Number of permitted developments within a designated Regeneration Opportunity Area
<p>4. Biodiversity and Green Infrastructure. To conserve and enhance biodiversity and geodiversity across Central Lincolnshire and provide opportunities for people to access and appreciate wildlife and the natural environment. To create and improve high quality green and blue spaces that are multifunctional, (including opportunities for sport, recreation and play), accessible to all and which form part of and are connected to the green infrastructure network.</p>	<ul style="list-style-type: none"> Area and condition of designated sites within Central Lincolnshire Habitat created through new development by type, extent and condition Habitat lost to development by type and extent Number of development sites including sensitive areas (irreplaceable habitats, designated sites and protected species) Number of planning consents requiring net gain Number of projects requiring net gain that have submitted a satisfactory biodiversity gain plan Local Nature Reserves per 1,000 population Developer Contributions secured for open space, sport facilities and recreation facilities through s106 and CIL payments Planning permissions granted for new open space, sports and recreation facilities by type and area Area of Local Green Space lost to development Area of Important Open Space lost to development
<p>5. Landscape and Townscape. To protect and enhance the rich diversity of the character and appearance of Central Lincolnshire's landscape and townscape, maintaining and strengthening local distinctiveness and sense of place.</p>	<ul style="list-style-type: none"> Area of land designated as Green Wedge lost to new development Number of approved applications for new build homes in the AONB
<p>6. Built and Historic Environment. To protect and enhance the significance of the buildings, sites and features of archaeological, historic or architectural and artistic interest and their settings, and ensure new buildings, spaces and places are designed to a high quality.</p>	<ul style="list-style-type: none"> Number of heritage assets by type Number and % of heritage assets on Historic England at risk register by type Number and % of Conservation Areas with an up-to-date character appraisal (less than 10 years old) Number of permitted developments within Conservation Areas. Percentage of planning applications where archaeological investigations were required prior to approval
<p>7. Natural Resources – Water.</p>	<ul style="list-style-type: none"> Percentage of water bodies at good ecological status or potential.

SA Objective	Potential Monitoring Indicators
To protect and enhance water resources and their quality in Central Lincolnshire.	<ul style="list-style-type: none"> • Percentage of water bodies assessed at good chemical status • Number of planning permissions granted contrary to the advice of the Environment Agency on water quality grounds • Percentage of new development incorporating water efficiency measures
8. Pollution To minimise pollution (air, noise and light) and improve air quality.	<ul style="list-style-type: none"> • Number and spatial extent of Air Quality Management Areas • Nitrogen dioxide emissions • Number of complaints made about noise, per 1,000 population
9. Natural Resources – Land Use and Soils. To protect and enhance soil and land resources and quality in Central Lincolnshire.	<ul style="list-style-type: none"> • Number of dwellings completed on previously developed land • Amount of employment floorspace completed on previously developed land • Number or area of contaminated sites remediated • Number of dwellings completed on Grade 1, 2 and 3a Agricultural Land, i.e. the best and most versatile agricultural land. • % Peat soils lost to development
10. Waste. To minimise the amount of waste generated across all sectors and increase the re-use, recycling and recovery rates of waste materials.	<ul style="list-style-type: none"> • Quantity of household, construction, demolition and commercial and industrial waste produced • % Household waste reused, recycled or composted
11. Climate Change Effects and Energy. To minimise the effects of climate change by developing the area's renewable energy resources, reducing dependency on fossil fuels, minimise energy usage, and to reduce greenhouse gas emissions from the area contributing to the achievement of a carbon net-zero Central Lincolnshire.	<ul style="list-style-type: none"> • Annual renewable energy generation by type • Installed capacity by type of renewable technology • Total carbon dioxide emissions per annum and by sector
12. Climate Change Adaptation and Flood Risk. To ensure Central Lincolnshire adapts to the effects of climate change, both now and in the future, through careful planning and design of development, including reducing and managing the risk of flooding from all sources.	<ul style="list-style-type: none"> • Spatial extent of flood risk zones • Number of planning permissions granted contrary to the advice of the Environment Agency on flood risk grounds • Permissions granted contrary to the advice of the Lead Local Flood Authority • % Development incorporating SuDS
13. Transport and Accessibility. To make efficient use of the existing transport infrastructure, reduce the need to travel by car, improve accessibility to jobs	<ul style="list-style-type: none"> • Travel to work by mode and travel time • Traffic on major roads

SA Objective	Potential Monitoring Indicators
and services for all and to ensure that all journeys are undertaken by the most sustainable travel modes (particularly public transport, walking and cycling).	<ul style="list-style-type: none"> • Travel times in minutes to key services by car • Travel times in minutes to key services by cycle • Travel times in minutes to key services by public transport • Travel times in minutes to key services by walk • Car ownership • Percentage of residents driving a car or van • Percentage of trips made using walking or cycling • Length of Public Rights of Way created/enhanced • Length of cycleways created/enhanced.
14. Employment. To create and improve access to high quality employment, training and learning opportunities for everyone within the Central Lincolnshire area.	<ul style="list-style-type: none"> • Average gross weekly earnings • Proportion of working age residents in employment and unemployed • Qualifications • Employment by sector
15. Local Economy. To encourage and support a competitive, diverse and stable economy and to protect and enhance Central Lincolnshire's hierarchy of centres to meet the needs of residents and visitors.	<ul style="list-style-type: none"> • Employment land availability • Amount of additional floorspace by employment type • Amount of additional floorspace for Town Centres Uses • Number of vacant retail units

Stage C Prepare the SA report

46. The Main SA Report, Appendices and this Non-Technical Summary form Stage C of the SA process and meet the requirements for environmental reports as set out in the SEA Regulations.⁴ They describe the SA work carried out for previous stages of the Local Plan.

Stage D Seek representations on the sustainability appraisal report

47. At each stage of the Local Plan, the Central Lincolnshire Authorities have prepared and published for consultation a SA Report and invited comments. Each report has been made available on the Central Lincolnshire website and comments have been recorded and considered at each stage.⁵ The following SA Reports have been made available for consultation during the preparation of the Local Plan:

- Central Lincolnshire Local Plan Review Draft SA Scoping Report (June 2019)
- Interim SA Report for the Draft Central Lincolnshire Local Plan (June 2021)

⁴ Schedule 1 12(3)

⁵ **Appendix 8** of the Main SA Report

- Final SA Main Report and Appendices for the Proposed Submission Central Lincolnshire Local Plan (March 2022)
- Addendum SA Report of reasonable alternative residential sites in medium and small villages (October 2022)
- Further SA Addendum Report for the Recommended Main Modifications (January 2023)

Conclusion

48. The Central Lincolnshire Local Plan has been subject to a detailed assessment against the SA Framework. The SA Report and this Non-Technical Summary meet the requirements for SA set out under the Planning and Compulsory Purchase Act 2004 and the Environmental Assessment Regulations 2004 and were found sound by the Independent Inspectors appointed by the Secretary of State to examine the Local Plan.
